INTRO TO JACKED GAZELLE

Welcome to Jacked Gazelle 2.0, the follow-up to our most popular TTM program, Jacked Gazelle (JG). Like the original JG, this is a concurrent training program, but JG2.0 takes things to the next level. It builds on the foundation of JG with a more well-rounded approach, focusing on total tactical athletic development beyond just running and powerlifting.

JG delivered incredible results for hundreds, and JG2.0 builds on that success with three more years of refined training experience and knowledge, specifically designed for advanced hybrid athletes.

In this program, we've moved away from percentages to better suit tactical athletes with unpredictable schedules and varying recovery conditions. Instead, JG2.0 uses RIR/RPE for a more adaptable and effective approach to intensity management.

JG2.0 focuses on:

- Strength
- Hypertrophy
- Power
- Anaerobic endurance
- Aerobic endurance
- Muscular endurance
- General work capacity
- Mobility (through full ROM movements)

The program has three 5-week phases, each with a unique split, giving you a taste of effective splits that are perfect for hybrid goals.

This isn't a low-volume program, but it's designed to strike the right balance. The goal is to help you become as fit as possible—not by pushing you to exhaustion, but by providing intentional, purposeful challenges. Expect it to be tough, but always with a clear purpose.

I hope you enjoy the program.

Kevin Smith,
Owner and Head Coach, Terminator Training Method

ACRONYMS

- **AMRAP**: As many rounds (or reps) as possible
- **BB**: Barbell
- **BUP**: Bottom up press
- **BW**: Bodyweight
- **Cal**: Calorie
- **DB**: Dumbbell
- **Ea**: Each leg/arm/side
- **Ext**: Extension
- **F**: Failure (used in place of RIR)
- **GHR**: Glute ham raise
- **GTOS**: Ground to over the shoulder (sandbag/dball)
- **HR**: Heart rate
- **HRPU**: Hand release pushup
- **KB**: Kettlebell
- **OO**: Odd object (e.g., dball or sandbag)
- **RDL**: Romanian deadlift
- **RIR**: Reps in reserve
- **ROM**: Range of motion
- RPE: Rate of perceived effort
- **SSB**: Safety squat bar

EXERCISE LIBRARY & SUBSTITUTIONS

Click to watch video tutorials

- 45° back raise - 45° back raise using a barbell & rack, hip thrusts
- 45° side raise - weighted side bends
- Back Squat - front squat, SSB squat, leg press, hack squat, pendulum squat, goblet squat
- Backward Drags - deadmill walks
- Bent Rows (barbell, dumbbell): chest supported rows, cable rows
- B-Stance RDL - Single leg RDL, DB RDL, Landmine SL RDL
- Bulgarian Split squat - Lunge (any), machine split squat, single leg leg press
- Cable Fly - machine fly, DB fly
- Cable lat prayer (aka straight arm pullover) - DB pullover, single arm cable pullover
- Cable Y Raise - DB lateral raise, cable lateral
- Chest Supported DB Row - chest supported machine/T-bar row, head supported row
- Chest support T-bar Row - chest support DB row, chest support machine row
- Chin ups - pull ups, rack chins, neutral chins, pulldowns
- Close Grip Incline Smith Press - incline BB or DB press, machine CG incline
- Close grip pushup - classic pushup, tricep pressdown
- Cross bench ab mat crunch - GHR crunch, roman chair leg raise, bosu ball crunch
- DB skull crusher - cable skull crusher, EZ bar skull crusher, JM press
- Deadlift - hex bar DL, sumo DL, RDL, Stiff Leg DL
- Deficit pushup - ring pushup, standard pushup, full ROM DB chest press, machine press
- Deficit Pushup Death Set - n/a

© Terminator Training Method, all rights reserved.

EXERCISE LIBRARY & SUBSTITUTIONS CONTINUED

- Dips (standard, chest focused - same vid) - decline press (machine, DB, BB), push up
- Double KB cleans - DB cleans, single arm KB cleans, KB swings, KB snatch
- Dumbell upright row - shrugs, kelso shrugs, EZ bar upright row
- Face Pull - banded face pull, upper back cable row, band pull apart, rear delt fly
- Farmer's carry - can use DBs, KBs, Hex, Torpedoes, Water cans
- *Flat Bench* - Flat machine, DB, smith press
- Front Rack Carry - barbell clean hold carry, frankenstein squat hold carry
- Front Squat - high bar squat, SSB squat, hack squat, pendulum squat, goblet squat
- Full warmup - add/subtract/adjust as needed
- GHR crunch - bosu ball crunch, cross bench ab mat crunch
- Glute Ham Raise - leg curl, nordic, 45° back extension
- Goblet Squat - front squat, hack squat, sissy squat, leg extension
- Hamstring curl (seated, lying) - banded hamstring curls, glute ham raises (if advanced)
- High incline delt press - smith machine press, BB press, machine delt press
- Incline bench curl - face away curl, standard DB curl
- Incline bench lateral raise - standing lateral raise (DBs or Cables)
- Incline bench press - incline DB press, incline smith press, incline machine press
- Incline DB press - machine press, incline DB or Smith machine press
- JM Press - skull crusher, overhead tricep extension
- KB bottom up press (BUP) - single arm DB press
- KB swing - KB clean, KB snatch, DB swings, box jumps, cleans (if proficient)
- Kelso shrugs - upright shrugs, leaned forward shrugs
- Lat pulldown - pull up, chin up, machine pulldown, single arm pulldown
- Leaned back lateral raise - cable laterals with handles at mid thigh height
- Leg extension - sissy squat, reverse nordic
- Lower warmup - add/subtract/adjust as needed
- Machine chest press - Alternate machine, DB press, deficit pushup
- Machine dips - classic BW or weighted dips, deficit pushups, slight decline DB/machine press
- Machine fly - cable fly, DB fly
- Machine Squat (belt, pendulum, leg press, hack) - SSB, back squat, front squat, zercher
- Neutral Chins - neutral pulldowns, supinated chins, rack chins
- Overhead KB carry - overhead DB carry
- Preacher Curl - spider curl, concentration curl
- Pull ups - chins, neutral grip chins, any lat pulldown, rack chins
- Pushup Plus - n/a
- Rack Chins - pull ups, inverted rows, lat pulldowns
- Rear delt fly - pec deck rear delt fly, cable rear delt fly, rear delt rows
- Reverse Lunge (deficit) - FFE split squat, hatfield reverse lunge, walking lunge, step up, bulgarian SS
- Ring pushup - deficit pushup, TRX pushup, dips/ring dips, pushups
- RDL - Stiff leg deadlift, hex bar deadlift, good morning
- Rope cable curl - hammer curl, straight bar cable curl
- Rope overhead extension - DB overhead extension, banded overhead extension
- Roman chair leg raises - hanging leg raise, elbow strap leg raise

© Terminator Training Method, all rights reserved.

EXERCISE LIBRARY & SUBSTITUTIONS CONTINUED

- Sandbag getups - Turkish getups, KB clean hold getups
- Sandbag GTOS - sandbag/odd object getups, KB clean
- Seated Calf raise - standing calf raise, bent knee bodyweight calf raise
- Stiff leg deadlift (SLDL) - 45 degree back raise (hamstring focus), deadlifts, RDL, good morning
- Single leg RDL - B-stance RDL
- Spider Curl - preacher curl, concentration curl
- SSB squat - back squat, front squat, machine squat
- Straight arm plate raise - cable front raise, DB front raise
- Straight leg sit ups - hanging or roman chair leg raise, bench reverse crunch, any sit up variation
- Suitcase carry - can use DBs, KBs, Torpedoes, Water cans
- Super ROM Cable Row - standard cable row for lats
- Supinated Chins - neutral grip chins, pull ups, pulldowns, rack chins
- Swiss Bar Bench - bench press, smith machine press, DB press
- Tib raise - can use machine, KBs, a tib bar, or (least suggested) bodyweight
- Tricep pushdown - banded pushdown, close grip pushup
- Upper Back Cable Row - CS row, BB bent row, face pull
- Upper warmup - add/subtract/adjust as needed
- Walking lunge - reverse lunge (deficit or non), split squat, step ups

JUMPS/ THROWS VIDEO LIBRARY & SUBSTITUTIONS

- ½ kneeling lateral ball toss - explosive cable chops, standing lateral ball toss
- Box jumps - vertical jumps, light hex bar jumps, tuck jumps
- Bumper plate jump pushups - clap push ups, smith machine throw press
- Depth Jumps - vertical jumps with focus on landing
- Drop step box jumps - box jumps, drop step vertical jumps
- Jumping Pushup (see upper warmup) - clapping pushups, smith machine throw press
- Lateral Depth Jumps - side step into verical, lateral depth jump with no vertical
- Med ball chest pass - lying med ball chest pass, jumping pushups
- Pogo hops - double under (jump rope)
- Pogos with Integrated High Hops - pogos
- Seated vertical jumps - seated box jumps, non seated vertical jumps
- Skips for distance - skips for height
- Skips for height - skips for distance
- Trap bar jumps - DB vertical jumps, BW vertical jumps

EXPLANATIONS OF NECESSARY TERMINOLOGY & CONCEPTS

Lifting Specific

REPS IN RESERVE (RIR) AND RATE OF PERCEIVED EXTERTION (RPE)

Reps in Reserve (RIR)

RIR estimates how many reps you could do before failure. For example, if you stop a set with 1 rep left in the tank, that's 1 RIR. RPE/RIR are tools to gauge effort, helping you manage intensity, load, and progress while minimizing injury risk.

Key Insight: The effectiveness of a set, especially in a lower-volume program like JGV2, depends on proximity to failure. The last 3-4 reps are the most stimulus-producing. Stopping 5+ reps shy of failure is far less effective unless you add sets, which leads to more fatigue and longer recovery times. Most exercises here prescribe only 2-3 sets, so each set must be high quality, aiming for no more than 2 RIR.
Nuance: My version of 0 RIR means stopping at your last good rep, not absolute failure (F), where you can't complete another rep. DO NOT sacrifice form. Your first rep should look as good as your last, even if slower due to fatigue.

Rate of Perceived Exertion (RPE)

RPE is a subjective scale (0-10) to rate effort. For instance, RPE 8 means challenging but you still have some in the tank; RPE 10 is max effort. This allows you to adjust intensity based on biofeedback like fatigue, recovery, and stress. RPE is typically used for lower-rep work, jumps, throws, and running.

RPE/RIR Nuances: An RPE 8 squat won't always be a perfect 2 RIR. The feel of a set depends on the exercise—higher reps, like curls, might feel less fatiguing at 1 RIR compared to a lower-rep compound lift.

Double Progression

Lifts aren't based on percentages but on RPE/RIR. Double progression means starting with a load that's challenging at the lower end of the rep range and increasing weight once you hit the top with 1-2 RIR. For example, in a 3x5-7 scheme, once you can hit 7 reps with 1-2 RIR, increase the weight by 5-10 lbs. This doesn't have to be perfect—RIR/RPE are subjective, but this is a reliable approach for progression.

PREPARING FOR LIFTS

Ramp-Up Sets

Ramp-ups are crucial but simple: lighter sets of 1-5 reps to warm up the muscles and joints, increasing weight each time without causing fatigue. The stronger you are, the more ramp-ups you'll need. For example, if you're aiming for a DB press of 100 lbs for 8 reps, your ramp-up sets might look like: 45x5, 60x3, 75x2-3, 90x1.

Rest Periods

Rest periods are flexible but ensure full recovery before your next set. Stronger lifters typically need longer rest times. The goal is to lift, not to turn the session into cardio. Don't cut rest short to feel fitter—it often means the opposite. If you're working on single-leg exercises, rest 1-2 minutes between legs for maximum effort.

EXPLANATIONS CONTINUED

COOLDOWNS FOR LIFTING SESSIONS

After lifting, prioritize recovery by switching from a sympathetic (fight-or-flight) state to a parasympathetic (rest and recover) state. Suggested cooldowns:

1. Walk outdoors with deep nasal breathing (5-15 min).
2. Lay on your back with feet up on a box or wall, practicing box breathing (equal inhale, hold, exhale, hold) or double-exhale breathing (exhale twice as long as the other phases).

Other options include light zone 1 cardio or low-stress stretching. The best choice is what you enjoy and will stick to.

SPLITTING UP TRAINING DAYS

On days with two sessions, follow these sequences:

- AM lift, PM conditioning
- AM conditioning, PM lift
- Lift, then run (if well-fueled)

Avoid: Run/conditioning immediately followed by lifting.

AUTOREGULATION

Autoregulation adjusts training based on how you feel that day. Factors like sleep, stress, and nutrition impact performance, so trust your biofeedback over data. Some signs you might be "off" include lethargy, soreness, or slow bar speed. Conversely, if you're feeling great, push a bit harder—but don't add unnecessary volume.

INTENSITY TECHNIQUES

Clusters

For clusters, use your approximate 8RM. Perform sets with short rest between mini-sets. For example:

- **Bench Clusters:** 3x3,3,3,3 (rest 15 sec between mini-sets, 3 minutes between full sets). If there's a '+' next to a set, perform an AMRAP (as many reps as possible) on the last mini-set of the final cluster.

Rest/Pause

Used on the last set of an isolation movement. After reaching failure, take short rests (15-20 sec), then push beyond initial fatigue with more reps (e.g., 3 reps, rest, 3 reps, rest, etc.).

Myo-Reps

Perform an activation set (12-15 reps to near failure). Then, after resting, complete mini-sets until you match your activation set's total reps. This maximizes muscle fatigue and growth in fewer sets.

EXPLANATIONS CONTINUED

DELOAD WEEK

Deload timing varies based on individual needs. Options:

- Between week 2&3 or 3&4 of Phase 2.
- 2 deloads: one between phases 1&2, the other between phases 2&3.
- A mid-program deload or a deload before test week in Phase 3.
- Or take 4-5 days off when needed.
-

Listen to your body; forcing a deload isn't always necessary, but the program's intensity likely calls for some form of recovery.

MAX/TIME TRIAL WEEK

This optional week is at the end of the program. Be cautious with load selection—no need for heroics. 3RMs are not required, and run time trials can be adjusted based on personal goals.

SPECIALTY BARS

Swiss bar - A swiss bar, also known as a football bar, is a neutral grip pressing bar that is commonly more shoulder friendly than a barbell. There are multiple versions of swiss bars, to include the cambared variety (Cadillac Bar from Kabuki Strength), any of which can be utilized in this program. If bench press has a history of causing shoulder or elbow problems for you, I highly suggest using one if you have the means. You just may thank me 10 years from now. You're also welcome to alternate phase to phase, or if you're a super-bencher, just stick to the barbell.

Safety Squat Bar - The safety squat bar (SSB) is a great way to load squats without the requirement of upper body mobility. The handles go over your shoulders, allowing for a more comfortable way to hold the bar. If you have a history of upper body issues from squats (common in low bar squatters), this can be a great tool. I typically suggest using the SSB (or Transformer Bar, again from Kabuki Strength) for most lifters over the age of 35 or anyone with 8+ years in SOF. That said, it's never too early. The SSB will allow you to load the legs and spine just as well as a barbell, without the added upper body strain that so many people face (often unwittingly) when doing consistent barbell squats. It'll also help those with long femurs stay more upright in their squats.

CONDITIONING OVERVIEW

Pre-Requisites: A Solid Aerobic Running Base

Before starting, I suggest ensuring you have a solid base, which you can gauge by either ~120 min/wk of slower running, or, if you're currently running tempos/repeats, that implies you've built a base). If you've built a base with non-running modalities or are below ~120 minutes, complete the base phase to minimize injury risk. Skipping the base phase is tempting, but it's the main reason running has a high injury rate. Building a base is simple yet essential for becoming a better runner and avoiding issues like shin splints or runner's knee.

Optional Base Phase (for beginners):

- MWF: 15-minute Zone 2 run
- Sat: 20-minute Zone 2 run
- Add 5 minutes to each run weekly or 10 minutes to a single run until you reach ~120 minutes.

If starting with more running volume: Add 15 minutes per week (or 10 minutes to your long run) until you hit ~120 minutes/week.

Touching on Speed: After 3-4 weeks of slow running (or immediately if you've been building a base), add 1-2 speed sessions per week with:

- Hill Work: 4-8 x 30-45 sec at 7-8 RPE on a moderate hill. Rest by walking back down. (start with ~4 and progress)
- Strides: 4-10 x 60-80 yards at 2-mile pace (7/10 effort). Rest as needed. (start with ~4 and progress)

Ensure you're not just clocking 120 minutes/week, but also feeling healthy and well-recovered.

Running RPE

- Zone 2 (Base building/easy run): RPE 4-5
- Long Run: RPE 5-6
- Tempo Run: RPE 6.5-7.5
- Threshold Run: RPE 7.5-8.5
- Speed Work (VO2 Max): RPE 8.5-10 (RPE 10 for time trials only)

Run Warm-Up (for speed, hills, tempo, time trials)

1. Jog: 5-10 minutes at a very slow pace.
2. Dynamic Stretching: Leg swings, lunges, butt kicks, and high knees.
3. Strides: 50-100m gradual build-up to goal pace, then ease back to a jog. Perform 3-6 strides, followed by 3-5 minutes of walking before starting your run.

Zone 2 Tracking

Stay in Zone 2 to ensure recovery and prevent overtraining. Use a combination of:

- Nasal breathing
- Heart rate (180 minus age (top of zone) - 15-20 BPM (bottom of zone) e.g if you're 30, your range is ~130-150 BPM
- Ability to carry a conversation without gasping for air
- Not necessary but optional: lab tested AeT and LTT prescriptions

© Terminator Training Method, all rights reserved.

CONDITIONING OVERVIEW CONTINUED

Speed Work

1. **Repeats**: Maintain consistent, repeatable pace for all intervals. You're not running repeats all out. The word "repeat" means that the pace you run should be repeatable (crazy concept, I know). The repeats may seem slow in week 1 of each phase. That's intentional, as it allows you to improve upon them as you go. If you start too hot in week 1, you'll struggle to match/beat in subsequent weeks.
2. **Hill Repeats**: Every few weeks, they will appear in the program. Hill work can be a great way to improve running speed and power with lower joint stress.
3. **Tempo Work**: Many people expect to get faster on their tempo runs every single week, which is doable but should NOT be expected. When you've completed a tempo run, ask yourself the following question: Could I have run at that same pace for another ~15 minutes? If the answer is unequivocally yes, you've executed the tempo run well. If it's questionable, you'll struggle to sustain paces and recovery in subsequent weeks.
4. **Cruise Intervals**: Similar to tempo runs, but with short recovery breaks to allow more time at tempo pace.

Nutrition/recovery

Your program is just a piece of the pie. Training is only effective in the extent to which it's recovered from. The training is the easy part. It's only a small percentage of your total week. If you train hard but fail to put in the effort outside the gym, you'll struggle. The TTM Recovery Guide Ebook is designed to help selection prep trainees with their recovery habits. Although its emphasis is on recovery for selection prep, the recovery laws are universal regardless of what your goals are. If you're unsure as to whether your recovery habits need improvement or not, this guide is highly recommended.

DELOAD (OPTIONAL)

	Weight Training	Conditioning	Notes
DAY 1 FOCUS *Full Body (Deload)*	**Prep** Full warmup **Main Lifts** Non axial loaded squat 2x6-8 @ 4-5 RIR Hinge 2x 6-8 @ 4-5 RIR Horizontal press 2x 6-8 @ 4-5 RIR Vertical pull 2x 6-8 @ 4-5 RIR	**Aerobic intervals (airbike, rower or ski)** 5 minutes easy warmup 21:00 of :15 hard (RPE 7-8), 1:15 easy (RPE 2-3) 5 minutes easy cooldown	**Main Lifts Guidelines** Suggested: Squat: Select a machine squat (pendulum, hack, leg press, belt) that you're used to (training in the respective phase) and hit 2 easy sets Hinge: select a hinge besides the conventional DL (preferably the hinge you're doing in this phase) and hit 2 easy sets Select the press and pull you're using in the respective phase
	Weight Training	**Conditioning**	**Notes**
DAY 2 FOCUS *Aerobic Intervals*	**None**	**Aerobic intervals (airbike, rower or ski)** 5 minutes easy warmup 21:00 of :15 hard (RPE 7-8), 1:15 easy (RPE 2-3) 5 minutes easy cooldown	This Session is optional Stick to RPE prescriptions If feeling good, you can opt to do a 20-30 min easy run instead
	Weight Training	**Conditioning**	**Notes**
DAY 3 REST	**None**	**None**	
	Weight Training	**Conditioning**	**Notes**
DAY 4 FOCUS *Full Body (Deload)*	**Prep** Full warmup **Main Lifts** Unilateral squat 2x6-8 @ 4-5 RIR Vertical push 2x 6-8 @ 4-5 RIR Unilateral hinge 2x6-8 @ 4-5 RIR Horizontal pull 2x 6-8 @ 4-5 RIR	**None**	**Main Lift Guidlines:** Same rules apply as day 1. No novel movements
	Weight Training	**Conditioning**	**Notes**
DAY 5 FOCUS *Pickup Run*	**None**	**Easy Run W/ Pickups** 30 minute easy run At minute 5, 15, 20, 25, speed up to threshold pace and hold for 45-60 seconds	
	Weight Training	**Conditioning**	**Notes**
DAY 6 REST	**None**	**None**	
	Weight Training	**Conditioning**	**Notes**
DAY 7 REST	**None**	**None**	

Note About Deload Week:

Deload timing varies based on individual needs. Options:
- Between week 2&3 or 3&4 of Phase 2.
- 2 deloads: one between phases 1&2, the other between phases 2&3.
- A mid-program deload or a deload before test week in Phase 3.
- Or take 4-5 days off when needed.

© Terminator Training Method, all rights reserved.

PHASE 1 | WEEK 1

	Weight Training	Conditioning	Notes
DAY 1 FOCUS *Lower Body* *Low Volume* *Repeats*	**Prep** Lower warmup **Jumps** a) Pogo hops 2x10 b) Seated box jump 2x2 **Pump Work** 1a) Lying leg curl 2x12-15 (RIR 1, 0) 1b) Backward drags 2x90 seconds **Main Lifts** 1) Back or safety squat bar (SSB) squat 3x5-7 (RIR 1-2) 2) RDL 3x6-8 (RIR 1-2)	**Repeats** **Run Warmup** 14x200m repeats Pace: *15-20 sec/mi faster than 2-mile time trial (TT) pace Rest: 1:1 work:rest Goal: repeatable pace, last lap best lap 5-8 min easy run or walk/run cooldown *If you run a 12-min 2-mi, that's 6:00/mi You'd run each 200 @ 5:40-5:45, aka ~42-43 sec/200 Suggestion: extend range + and - 1 (41-44)	**Prep:** add/subtract/adjust warmup as needed (do warmup pre-jumps) Rest 90 seconds between a & b Jumps: Max effort. Jump as high as possible, but to a reasoable box height. step/crawl (DON'T JUMP) off the box **Pump Work:** goal = pump in hams/quads & warm up the knees. Backward drag: light/easy; intent is pump/bloodflow. Stagger set suggested, not required (base it on gym setup.) **Main Lifts: Rest 2-4 minutes between main movement sets** Squat: SSB or BB (high or low bar) RDL: BB, hex bar, DBs or belt squat machine **Repeats:** can be done immediately AFTER lifting or later in the day. Stick to pacing parameters
DAY 2 FOCUS *Upper Body* *Recovery Cardio*	**Prep** Upper warmup **Pump Work** a) Cable face pull 2x12-15 c) Cable lat prayer 2x10-12 d) Straight arm plate raise 2x10-12 **Main Lifts** 1a) BB or swiss bar bench 3x5-7 (RIR 1-2) 1b) Jumping pushup 3x5 (max effort) 2) Chest supported row 2x8-10 (RIR 1) 3a) Dips or machine dips 2x5-7 (RIR 1-2) 3b) Chin ups 2x5-7 (RIR 1-2) **Core/Calisthenics** 1a) 45 -deg side raises 2x2 RIR each 1b) Hand release push up or classic pushups 2x30 sec	**Optional** Recovery cardio (low-impact) 15-20 min, high Z1/low Z2	**Prep:** add/subtract/adjust warmup as needed (do warmup pre-jumps/tosses) **Pump Work:** goal = pump in the upper back, lubricate shoulders Do them as a tri-set, resting as needed **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** 1a) Choose swiss/cadillac bar if barbell isn't shoulder friendly for you. 1b) Jump pushups between *ramp up* sets (not working sets) 2) Chest-supported row - DBs on incline bench or any horizontal machine 3a) Chins: grip of choice (supine/neutral/angles 90s); if you can do 7+ w/ body weight w/ a slow negative, can do weighted chins 3b) Dips (parallel bar): same as chins If you opt for machine dips, can hit them closer to failure (0-1 RIR) **Core/Cals:** Side raises: note leg stagger setup (top leg forward) slow & controlled, feel the deep oblique stretch. Go till 2 reps in tank Pushups: variant that applies to your goals most **Recovery Cardio:** options: bike, row, incline walk, stairs, ski, jacob's ladder, versa, elliptical. If advanced runner, can run
DAY 3 FOCUS *Tempo/Cruise*	**None**	**Cruise Intervals** 8:00 easy run warmup 4x5 minute tempo intervals 4:00 at *tempo pace 1:00 easy recovery jog 8:00 easy run cooldown *see notes for pacing options	**Easy Warmup Run:** zone 1 creeping into zone 2 Can perform 'run warmup' if desired Can rest 2-3 min between warmup & 1st cruise interval **Tempo Pace:** **Primary:* RPE 7.5-8 **Alternate:* ~8-15 sec/mi slower than 5 mi time trial (E.g. if you run a 35:00 5 mi/7:00/mi, your goal pace is 7:08-7:15/mi) **Contingency:* can say 4-5 words at a time between breaths **Emergency:* 80-88% max HR (using chest strap) **Recovery Jog:** as slow as needed to repeat effort. If you feel need to walk, slow down tempo portion **Cooldown:** slowly bring HR back down to zone 2
DAY 4 FOCUS *Upper Body* *Metcon*	**Prep** Upper warmup **Power/Stability** a) Medicine ball chest pass 3x5 b) Overhead kettle bell (KB) carry 3x25 yd ea **Main Lifts** 1) Smith machine close grip incline press 2x6-8 (RIR 1-2) 2) Cable extra ROM Row 2x10-12 (RIR 1-2) 3) High incline DB press 3x6-8 (RIR 1-2) **Arm Farm (All - set 1: 1RIR, set 2: 0 RIR)** 1a) Tricep pushdown 2x10-12 1b) Cable curl 2x10-12 2a) Incline bench lateral raise 2x10-12 2b) Spider curl 2x8-10	**Metcon** 12 minute AMRAP 15 cal row 5 Kettle bell snatches 5 Kettle bell cleans 5 Kettle bell push press *Metcon Guidelines Rower on 4-6 damper (+/- 125 drag factor) 2xKB = 1 in each hand KB load selection: if you were to do a set of 6 snatches while FRESH, it'd be a 5 RPE	**Prep:** add/subtract/adjust warmup as needed (do warmup pre-jumps) Rest: 90 seconds between a & b Max effort; Chest pass: use 12-20 lbs med ball. KB carry: single arm, start light, walk slow & controlled, can use DB if desired **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** NOTE: your lats/pecs may be a bit sore week 1 from day 2, this is fine and will decrese week to week -Smith machine suggested. Can use BB/swiss bar or a machine press if preferred -Optional: reverse band it w/ thinner band. Low (~10-30%) incline. Close grip = no closer than shoulder width -Row variaton takes skill and body awareness. Start w/ some ramp ups to get the feel. Can sub for more traditional cable rows if unsure -High incline press = 60-70 deg incline (not vertical) **Arm Farm: (Rest 15-45 sec between a&b, ~60-90 seconds between sets)** 1a & b, EZ/straight bar suggested>rope (not required) 2 a & b: bench at ~70° for laterals, 30-60° for curls (iffy shoulders = higher incline) Rest as needed between superset movements (30-45 sec)
DAY 5 FOCUS *Lower Body* *(volume)*	**Prep** Lower warmup **Jumps** a) Skips for height 2x5-7each leg (alternating) **Pump Work** 1a) Seated leg curl 2x12-15 (RIR 1, 0) 1b) Calf raise (seated) 2x6-8 (RIR 1, 0) 1c) Goblet squat tempo 2x6-8 w/ 3-4 sec eccentric, 2 sec pause **Main Lifts** 1) Machine squat 1x8-10, 1x10+ (RIR 1-2) 2) 45° back raise 3x10-12 (RIR 1, 1, 0) 3) Deficit reverse lunges 2x8-10 ea (RIR 1-2) **Core** 1a) Glute ham raise crunch 3x1 RIR 1b) Farmer's carry 3x50 yd	**None**	**Prep:** add/subtract/adjust warmup as needed (do warmup pre-jumps) Rest: ~90sec-3 min between sets of skips Max effort alternating skips for HEIGHT, not distance **Pump Work: (Rest as needed between stagger sets)** Goal = pump in hams, quads, lube knees, enhance ankle mobility Calf raises: hold bottom stretch each rep ~3 sec & drive toe to shin. No pause at top, slow eccentric Can do standing if no seated machine. Leg curl: push into pad (no leaning forward - that'll occur in phase 3) Goblets: goal is prep/mobility, not work sets. Plenty of RIR **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between legs on lunges)** Machine squat: hack, pendulum, leg press, belt, smith machine, rogers machine 2nd set (10+) done w/ less load 45°s: can be subbed for hip thrusts if more practical. Reverse lunges: target glutes (larger step back, vertical shin, lean torso forward) **Core Work:** Glute ham raise crunch: emphasize stretch, short ROM (not full situp); rib cage to pelvis Carries: 70-80% of BW total (i.e. if using KBs, each one 35-40% of bodyweight
DAY 6 FOCUS *Aerobic* *Conditioning*	**None**	**Long Run** 60 minute long run, aerobic effort (zone 2)	**Aerobic Run (Zone 2)** Measurement options: P: Conversational pace A: Nasal breathing C: HR: MAF 180 or 65-70% of MHR if known E: RPE 4-5 E:"Easy" Optimal: pick 2 and use them weekly *Running not required - can opt for alternative zone 2 implement if desired
DAY 7 REST	**None**	**None**	

© Terminator Training Method, all rights reserved.

PHASE 1 | WEEK 2

DAY 1 FOCUS
Lower Body (low volume)
Repeats

Weight Training	Conditioning	Notes
Prep Lower warmup **Jumps** a) Pogo hops 2x10 b) Seated box jump 2x2 **Pump Work** 1a) Lying leg curl 2x12-15 (RIR 1, 0) 1b) Backward drags 2x90 seconds **Main Lifts** 1) Back or SSB squat 3x5-7 (RIR 1-2) 2) RDL 3x6-8 (RIR 1-2)	**Repeats** **Run Warmup** 16x200m repeats Pace: *match/1-2 sec faster than week 1 200s Rest: 1:1 work:rest Goal: repeatable pace, last lap best lap 5-8 min easy run or walk/run cooldown *Pacing example: If avg. pace last week was 43 sec/200, this week you're aiming for 41-43 avg.	**Prep:** refer to week 1 intent/rest **Pump Work:** refer to week 1 for intent/rest use double progression on ham curls (add load if you hit 15 last week) Drags: keep load the same, or add 5-10# if it was super light **Main Lifts: (Rest 2-4 minutes between main movement sets)** Same bars for squats & RDLs as week 1 - double progression (explained in intro) **Repeats:** can be done immediately after lifting or later in the day. Stick to pacing parameters

DAY 2 FOCUS
Upper Body
Recovery Cardio

Weight Training	Conditioning	Notes
Prep Upper warmup **Pump Work** a) Cable face pull 2x12-15 c) Cable lat prayer 2x10-12 d) Straight arm plate raise 2x10-12 **Main Lifts** 1a) BB or swiss bar bench 3x5-7 (RIR 1-2) 1b) Jumping pushup 3x5 (max effort) 2) Chest supported row 2x8-10 (RIR 1) 3a) Dips or machine dips 2x5-7 (RIR 1-2) 3b) Chin ups 2x5-7 (RIR 1-2), rest 60 sec after set 2, 1x BW x max **Core/Cals** 1a) 45 Deg Side Raises 2x1 RIR ea 1b) Hand release push up or classic pushups 1x45 sec, 1x30 sec	**Optional** Recovery cardio (low-impact) 15-20 min, high Z1/low Z2	**Prep:** refer to week 1 intent/rest **Pump Work:** refer to week 1 for intent/rest can add load to face pulls or SA plate raise as desired, sticking w/ intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** Same bar for bench as as week 1 - double progression Same CS row, dip, chin up variation Chins: BW set post weighted - perfect technique **Core Work:** see week 1 for intent **Recovery Cardio:** options: bike, row, incline walk, stairs, ski, jacob's ladder, versa, elliptical. If advanced runner, can run

DAY 3 FOCUS
Tempo/Cruise

Weight Training	Conditioning	Notes
None	**Cruise Intervals** 8:00 easy run warmup 4x5:30 tempo intervals 4:30 at tempo pace 1:00 easy recovery jog 8:00 easy run cooldown	**Easy Warmup Run:** zone 1 creeping into zone 2 Can perform 'run warmup' if desired **Tempo Pace:** **Primary:* match last week's pace if well executed **Alternate:* more repeatable than last week **Tertiary:* 8-15 sec/mi faster than 5 mi TT **Overall:* 7.5-8 RPE **Recovery Jog:** as slow as needed to repeat effort. If you feel need to walk, slow down tempo portion **Cooldown:** slowly bring HR back down to zone 2

DAY 4 FOCUS
Upper Body
Metcon

Weight Training	Conditioning	Notes
Prep Upper warmup **Power/Stability** a) Medicine ball chest pass 3x5 b) Overhead KB carry 3x25 yd ea **Main Lifts** 1) Smith machine CG incline press 2x6-8 (RIR 1-2) 2) Cable extra ROM Row 2x10-12 (RIR 1-2) 3) High incline DB press 3x6-8 (RIR 1-2) **Arm Farm (All - set 1: 0 RIR, set 2: Failure)** 1a) Tricep pushdown 2x10-12 1b) Cable curl 2x10-12 2a) Incline bench lateral raise 2x10-12 2b) Spider curl 2x8-10	**Metcon** 12 minute AMRAP 15 cal row 5 KB snatches 5 KB cleans 5 KB push press Beat last week's rounds/partials using same loads	**Prep:** see week 1 instructions for intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** See week 1 instructions for intent Same bars/setups as week 1 Double progression **Arm Farm: (Rest 15-45 sec between a&b, ~60-90 seconds between sets)** See week 1 for intent **Pump Work:** See week 1 instructions for intent

DAY 5 FOCUS
Lower Body
(volume)

Weight Training	Conditioning	Notes
Prep Lower warmup **Jumps** a) Skips for height 2x5-7 each leg (alternating) **Pump Work** 1a) Seated leg curl 2x12-15 (RIR 0) 1b) Calf raise (seated) 2x6-8 (RIR 0) 1c) Goblet squat tempo 2x6-8 w/ 3-4 sec eccentric, 2 sec pause **Main Lifts** 1) Machine squat 1x8-10, 1x10+ (RIR 1-2) 2) 45° back raise 3x10-12 (RIR 1, 0, 0) 3) Deficit reverse lunges 2x8-10 ea (RIR 1-2) **Core** 1a) Glute ham raise crunch 3x1 RIR 1b) Farmer's carry 3x50 yd	**None**	**Prep/Jumps:** refer to week 1 intent/rest **Pump Work: (Rest as needed between stagger sets)** Refer to week 1 for intent/rest Double progression on calf raise, leg curl **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between legs on lunges)** Same machine for squat as week 1 - double progression Back raise, lunges: double progression Goal=Add 1 rep of side raise to each set **Core Work:** see week 1 for intent

DAY 6 FOCUS
Aerobic Conditioning

Weight Training	Conditioning	Notes
None	**Ruck** 60 minute ruck, fastest walking pace	Rucking not required - if opting to run or another form of conditioning, do 70 minutes Ruck weight (levels based on RUCKING expereince, not overall training) **Beginner** (<5 rucks ever) 20 lbs (30-40 minutes) **Rusty** (<3 rucks in last 6 mo) 25 lbs (40-50 minutes) **Weekend warrior** (1 or more ruck/mo in last 6 mo) 30 lbs **Rucking regular** (2+ rucks/mo) 40-45 lbs

DAY 7 REST

Weight Training	Conditioning	Notes
None	**None**	

© Terminator Training Method, all rights reserved.

PHASE 1 | WEEK 3

DAY 1 FOCUS
Lower Body (low volume)
Repeats

Weight Training	Conditioning	Notes
Prep Lower warmup **Jumps** a) Pogo hops 2x12 b) Seated box jump 2x3 **Pump Work** 1a) Lying leg curl 2x12-15 (RIR 0) 1b) Backward drags 2x 2 min **Main Lifts** 1) Back or SSB squat 3x5-7 (RIR 1-2) 2) RDL 3x6-8 (RIR 1-2)	**Repeats (hill week)** **Run Warmup** 8x45 second hill repeats Effort: 8-9 RPE & REPEATABLE Incline: 6-7% (or outdoor equivalent) Rest: 1:30 (or walk to base if outdoors) Goal: repeatable pace, last lap best lap 5-8 min easy run or walk/run cooldown	**Prep:** refer to week 1 intent/rest **Pump Work:** refer to week 1 for intent/rest Use double progression on ham curls (add load if you hit 15 last week) Drags: keep load the same, or add 5-10# if it was super light **Main Lifts: (Rest 2-4 minutes between main movement sets)** Same bars for squats & RDLs as week 1 - double progression **Repeats (hills):** For most controlled environment, perform these indoors. (not required) Pacing should be ~ your 2 mile pace or slightly faster, unless hill is very steep (not suggested)

DAY 2 FOCUS
Upper Body
Recovery Cardio

Weight Training	Conditioning	Notes
Prep Upper warmup **Pump Work** a) Cable face pull 2x12-15 c) Cable lat prayer 2x10-12 d) Straight arm plate raise 2x10-12 **Main Lifts** 1a) BB or swiss bar bench 3x5-7 (RIR 1-2) 1b) Jumping pushup 3x5-7 (max effort) 2) Chest supported row 2x8-10 (RIR 0) 3a) Dips or machine dips 2x5-7 (RIR 1-2) 3b) Chin ups 2x5-7 (RIR 1-2) **Core/Cals** 1a) 45 Deg side raises 2x1 RIR ea 1b) Hand release pushup or classic pushups 2x45 sec	**Optional** Recovery cardio (low-impact) 15-20 min, high Z1/low Z2	**Prep:** refer to week 1 intent/rest **Pump Work:** refer to week 1 for intent/rest Can add load to face pulls or SA plate raise as desired, sticking w/ intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** Same bar for bench as as week 1 - double progression Same CS row, dip, chin up variation **Recovery Cardio:** options: bike, row, incline walk, stairs, ski, jacob's ladder, versa, elliptical. If advanced runner, can run

DAY 3 FOCUS
Tempo/Cruise

Weight Training	Conditioning	Notes
None	**Tempo Run** 8:00 easy run warmup 20:00 tempo run 8:00 easy run cooldown	**Easy Warmup Run:** zone 1 creeping into zone 2 Can perform 'run warmup' if desired **Tempo:** **Primary:* match last week's pace if well executed **Alternate:* improve over last week w/o rest periods **Overall:* 7.5-8 RPE **Recovery Jog:** Non existent this week. If you can't hold last week's pace this week, you're may be going too hard on the cruise intervals

DAY 4 FOCUS
Upper Body
Metcon

Weight Training	Conditioning	Notes
Prep Upper warmup **Power/Stability** a) Medicine ball chest pass 3x5 b) Overhead KB carry 3x25 yd ea **Main Lifts** 1) Smith machine CG incline press 2x6-8 (RIR 1-2) 2) Cable extra ROM Row 2x10-12 (RIR 1, 0) 3) High incline DB press 3x6-8 (RIR 1-2) **Arm Farm (All: 0 RIR, see notes for intensity techs)** 1a) Tricep pushdown 1x10-12, 1x10-12+3,3,3 1b) Cable curl 2x10-12 2a) Incline bench lateral raise 1x10-12, 1x10-12+3,3,3 2b) Spider curl 1x10-12, 1x10-12.2-3	**Metcon** 125 calories for time on airbike **Echo Bike:** Every 3:00, get off bike and do 6 DB man-makers **Assault Bike:** Every 2:30, get off bike and do 6 DB man-makers Goal is to hit 125 cals as fast as possible w/ the periodic breaks for man-makers (clock keeps running)	**Prep:** see week 1 instructions for intent **Main Lifts:(Rest 2-4 min between sets, 60-90 sec between stagger sets)** See week 1 instructions for intent Same bars/setups as week 1 Double progression **Arm farm: (Rest 15-45 sec between a&b, ~60-90 seconds between sets)** Rest/pause on last set of pushdowns and laterals Finish set, then take a 15-20 second break, hit 3 more reps (same load), repeat x2 Spider curls 10-12.2-3 = 2nd set, 2-3 partials w/ perfect form **Pump Work:** See week 1 instructions for intent **Metcon:** Man maker weight: 6 reps = ~6 RPE Assault bikes require less time/effort per calorie burned than echo bikes, hence the time difference. If using another airbike, use your best judgement. Depending on fitness, 3-6 rds of manmakers would be a reasonable result.

DAY 5 FOCUS
Lower Body
(volume)

Weight Training	Conditioning	Notes
Prep Lower warmup **Jumps** a) Skips for height 2x5-7 each leg (alternating) **Pump Work** 1a) Seated leg curl 1x12-15 (RIR 0) 1x12-15.2-3 1b) Calf raise (seated) 2x6-8 (RIR 0) + 10-15 sec stretch hold post set 2 1c) Goblet squat tempo 2x6-8 w/ 3-4 sec eccentric, 2 sec pause **Main Lifts** 1) Machine squat 1x8-10, 1x10+ (RIR 1) 2) 45° back raise 3x10-12 (RIR 1, 0, F) 3) Deficit reverse lunges 2x8-10 ea (RIR 1) **Core** 1a) Glute ham raise crunch 3x0 RIR 1b) Farmer's carry 3x50 yd	**None**	**Prep:** refer to week 1 intent/rest **Pump Work: (Rest as needed between stagger sets)** Leg curl 2nd set = 12-15.2-3 aka 2-3 partials Calf raise: after last rep of set 2, hold bottom stretch for 10-15 sec Refer to week 1 for intent/rest (optional: reduce load by ~5-10% before stretch) Double progression on calf raise, leg curl **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between legs on lunges)** Same machine for squat as week 1 - double progression Back raise, lunges: double progression Goal=Add 1 rep of side raise to each set **Core Work:** see week 1 for intent

DAY 6 FOCUS
Aerobic Conditioning

Weight Training	Conditioning	Notes
None	**Long Run** 70 minute long run, aerobic effort	**Aerobic Run (Zone 2)** Measurement options: P: Conversational pace A: Nasal breathing C: HR: MAF 180 or 65-70% of MHR if known E: RPE 4-5 E:"Easy" Optimal: pick 2 and use them weekly *Running not required - can opt for alternative zone 2 implement if desired

DAY 7 REST

Weight Training	Conditioning	Notes
None	**None**	

© Terminator Training Method, all rights reserved.

PHASE 1 | WEEK 4

	Weight Training	Conditioning	Notes
DAY 1 FOCUS *Lower Body (low volume)* *Repeats*	**Prep** Lower warmup **Jumps** a) Pogo hops 2x12 b) Seated box jump 2x3 **Pump Work** 1a) Lying leg curl 2x12-15 (RIR 0, F) 1b) Backward drags 2x2 min **Main Lifts** 1) Back or SSB squat 3x5-7 (RIR 1-2) 2) RDL 3x6-8 (RIR 1-2)	**Repeats** **Run Warmup** 18x200m repeats Pace: match/1-2 sec faster than week 2 200s Rest: 1:1 work:rest Goal: repeatable pace, last lap best lap 5-8 min easy run or walk/run cooldown	**Prep:** refer to week 1 intent/rest **Pump Work:** refer to week 1 for intent/rest Use double progression on ham curls (add load if you hit 15 last week) Drags: keep load the same, or add 5-10# if it was super light **Main Lifts: (Rest 2-4 minutes between main movement sets)** Same bars for squats & RDLs as week 1 - double progression **Repeats:** can be done immediately after lifting or later in the day. Stick to pacing parameters
DAY 2 FOCUS *Upper Body* *Recovery Cardio*	**Prep** Upper warmup **Pump Work** a) Cable face pull 2x12-15 c) Cable lat prayer 2x10-12 d) Straight arm plate raise 2x10-12 **Main Lifts** 1a) BB or swiss bar bench 3x5-7 (RIR 1-2) 1b) Jumping pushup 3x6 (max effort) 2) Chest supported row 2x8-10 (RIR 0, F) 3a) Dips or machine dips 2x5-7 (RIR 1-2) 3b) Chin ups 2x 5-7 (RIR 1-2), rest 60 sec after set 2, 1x BW x max **Core/Cals** 1a) 45 Deg side raises 2x0 RIR ea 1b) Hand release push up or classic pushups 1x60 sec, 1x45 sec	**Optional** Recovery cardio (low-impact) 15-20 min, high Z1/low Z2	**Prep:** refer to week 1 intent/rest **Pump Work:** refer to week 1 for intent/rest Can add load to face pulls or SA plate raise as desired, sticking w/ intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** Same bar for bench as as week 1 - double progression Same CS row, dip, chin up variation **Recovery Cardio:** options: bike, row, incline walk, stairs, ski, jacob's ladder, versa, elliptical. If advanced runner, can run
DAY 3 FOCUS *Tempo/Cruise*	**None**	**Cruise Intervals** 8:00 easy run warmup 4x6:30 tempo intervals 5:30 at tempo pace 1:00 easy recovery jog 8:00 easy run cooldown	**Easy Warmup Run:** zone 1 creeping into zone 2 Can perform 'run warmup' if desired **Tempo Pace:** **Primary:* ~8-15 sec/mi slower than 5 mi TT **Alternate:* RPE 7.5-8 **Tertiary:* 80-88% max HR (using chest strap) **Emergency:* can say 4-5 words at a time b/n breaths **Recovery Jog:** as slow as needed to repeat effort. If you feel you need to walk, slow down the tempo portion **Cooldown:** slowly decrease HR back down to zone 2
DAY 4 FOCUS *Upper Body* *Metcon*	**Prep** Upper warmup **Power/Stability** a) Medicine ball chest pass 3x5 b) Overhead KB carry 3x25 yd ea **Main Lifts** 1) Smith machine CG incline press 3x6-8 (RIR 1-2) 2) Cable extra ROM row 2x10-12 (RIR 1, 0) 3) High incline DB press 3x6-8 (RIR 1-2) **Arm Farm (All: 0 RIR, see notes for intensity techs)** 1a) Tricep pushdown 2x10-12 1b) Cable curl 2x10-12 2a) Incline bench lateral raise 1x10-12, 1x10-12.2-3 2b) Spider curl 2x8-10	**Metcon** 125 calories for time on airbike **Echo Bike:** Every 3:00, get off bike and do 6 DB man-makers **Assault bike:** Every 2:30, get off bike and do 6 DB man-makers Goal is to hit 125 cals as fast as possible w/ the periodic breaks for man-makers (clock keeps running)	**Prep:** see week 1 instructions for intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** **If using a BB for incline bench, DO NOT go to 0 RIR, thats Smith machine only** See week 1 instructions for intent Same bars/setups as week 1 Double progression **Pump Work:** See week 1 instructions for intent **Metcon:** Same conditions as last week
DAY 5 FOCUS *Lower Body (volume)*	**Prep** Lower warmup **Jumps** a) Skips for height 2x7-9 each leg (alternating) **Pump Work** 1a) Seated leg curl 2x12-15 (RIR 0, F) 1b) Calf raise (seated) 2x6-8 (RIR 0, F) 1c) Goblet squat tempo 2x6-8 w/ 3-4 sec eccentric, 2 sec pause **Main Lifts** 1) Machine squat 1x8-10, 1x10+ (RIR 1, 0) 2) 45° back raise 3x10-12 (RIR 0, 0, F) 3) Deficit reverse lunges 2x8-10 ea (RIR 0) **Core** 1a) Glute ham raise crunch 3x0 RIR 1b) Farmer's carry 3x50 yd	**None**	**Prep:** refer to week 1 intent/rest **Pump Work: (Rest as needed between stagger sets)** Refer to week 1 for intent/rest Double progression on calf raise, leg curl **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between legs on lunges)** Same machine for squat as week 1 - double progression ***Squat: ONLY hit 0 RIR set 2 if on a failsafe machine or if you have a spotter*** Back raise, lunges: double progression Goal=Add 1 rep of side raise to each set **Core Work:** see week 1 for intent
DAY 6 FOCUS *Aerobic Conditioning*	**None**	**Ruck** 70 minute ruck, fastest walking pace	Rucking not required - if opting to run or another form of conditioning, do 80 minutes Ruck weight Same as ruck 1, or no more than + 5 lbs from last ruck (50 lbs is suggested max for anyone)
DAY 7 REST	**None**	**None**	

© Terminator Training Method, all rights reserved.

PHASE 1 | WEEK 5

	Weight Training	Conditioning	Notes
DAY 1 FOCUS *Lower Body (low volume)* *Aerobic Intervals*	**Prep** Lower warmup **Jumps** a) Pogo hops 2x15 b) Seated box jump 2x3 **Pump Work** 1a) Lying leg curl 2x12-15 (RIR 0, F) 1b) Backward drags 2x2:30 **Main Lifts** 1) Back or SSB squat 3x5-7 (RIR 1-2) 2) RDL 3x6-8 (RIR 1)	**Non Repeat Week (non impact)** Aerobic intervals (airbike, rower or ski) 10 minutes easy warmup 21:00 of :15 hard (RPE 7-8), 1:15 easy (RPE 2-3) 10 minutes easy cooldown	**Prep:** refer to week 1 intent/rest **Pump Work:** refer to week 1 for intent/rest Use double progression on ham curls (add load if you hit 15 last week) Drags: keep load the same, or add 5-10# if it was super light **Main Lifts: (Rest 2-4 minutes between main movement sets)** Same bars for squats & RDLs as week 1 - double progression **Repeats:** can be done immediately after lifting or later in the day. Stick to pacing parameters
DAY 2 FOCUS *Upper Body*	**Prep** Upper warmup **Pump Work** a) Cable face pull 2x12-15 c) Cable lat prayer 2x10-12 d) Straight arm plate raise 2x10-12 **Main Lifts** 1a) BB or swiss bar bench 3x5-7 (RIR 1-2) 1b) Jumping pushup 3x7 (max effort) 2) Chest supported row 2x8-10 (RIR 0, F) 3a) Dips or machine dips 2x5-7 (RIR 1-2) 3b) Chin ups 2x 5-7 (RIR 1-2) **Core/Cals** 1a) 45 Deg side raises 2x0 RIR ea 1b) Hand release push up or classic pushups 2x60 sec	**None**	**Prep:** refer to week 1 intent/rest **Pump Work:** refer to week 1 for intent/rest Can add load to face pulls or SA plate raise as desired, sticking w/ intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** Same bar for bench as as week 1 - double progression Same CS row, dip, chin up variation **Recovery Cardio:** none this week
DAY 3 REST	**None**	**None**	
DAY 4 FOCUS *Upper Body* *Pickup Run*	**Prep** Upper warmup **Power/Stability** a) Medicine ball chest pass 3x5 b) Overhead KB carry 3x25 yd ea **Main Lifts** 1) Smith machine CG incline press 3x6-8 (RIR 1) 2) Cable extra ROM row 2x10-12 (RIR 0) 3) High incline DB press 3x6-8 (RIR 1-2) **Arm Farm (All: 0 RIR, see notes for intensity techs)** 1a) Tricep pushdown 1x10-12, 1x10-12+3,3,3 1b) Cable curl 2x10-12 2a) Incline bench lateral raise 1x10-12, 1x10-12.2-3 2b) Spider curl 1x10-12, 1x10-12+3,3,3	**Easy Run w/ Pickups** 30 minute easy run At minute 5, 10, 15, 20, 25, speed up to ~tempo pace and hold for 45 seconds	**Prep:** see week 1 instructions for intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** **If using a BB for incline bench, DO NOT go to 0 RIR, that's Smith machine only** See week 1 instructions for intent Same bars/setups as week 1 Double progression **Arm Farm:** rest/pause on last set of pushdowns and laterals Finish set, then take a 15-20 second break, hit 3 more reps (same load), repeat x2 10-12.2-3 (laterals) = 2nd set, hit 2-3 partials post failure **Easy Run: If HR climbs in later pickups, NBD** Just keep easy portions very easy, and don't surpass threshold pace on pickups
DAY 5 FOCUS *Lower Body (volume)*	**Prep** Lower warmup **Jumps** a) Skips for height 2x7-9 each leg (alternating) **Pump Work** 1a) Seated leg curl 1x12-15 (RIR 0), 1x12-15.2-3 1b) Calf raise (seated) 2x6-8 (RIR 0) + 10-15 sec stretch hold post set 2 1c) Goblet squat tempo 2x6-8 w/ 3-4 sec eccentric, 2 sec pause **Main Lifts** 1) Machine squat 1x8-10, 1x10+ (RIR 1, 0) 2) 45° back raise 3x10-12 (RIR 0, 0, F) 3) Deficit reverse lunges 2x8-10 ea (RIR 0) **Core** 1a) Glute ham raise crunch 3xF 1b) Farmer's carry 3x50 yd	**None**	**Prep:** refer to week 1 intent/rest **Pump Work: (Rest as needed between stagger sets)** ***Leg curl 2nd set = 12-15.2-3 aka 2-3 partials*** ***Calf raise after last rep of set 2, hold bottom stretch for 10-15 sec*** Refer to week 1 for intent/rest Double progression on calf raise, leg curl **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between legs on lunges)** Same machine for squat as week 1 - double progression If going to 0RIR, do on failsafe machine or use spotter Back raise, lunges: double progression Goal=Add 1 rep of side raise to each set **Core Work:** see week 1 for intent
DAY 6 FOCUS *Aerobic Conditioning*	**None**	**Walk/Run** 75 minute walk/run First 30 minutes, steady pace easy run Last 45 minutes: easy run 10 min, walk 5 min every 15 minutes (aka 3x15 minute blocks, 2/3 running, 1/3 walking) ALL easy paced	This is a "recovery" biased session pre phase 2 Your overall effort should be low. HR will fluctuate on the walk/run portion, this is fine. You should feel energized after this, not smoked
DAY 7 REST	**None**	**None**	

© Terminator Training Method, all rights reserved.

PHASE 2 | WEEK 1

DAY 1 FOCUS
Lower Body (low volume)
Repeats

Weight Training	Conditioning	Notes
Prep: Lower warmup **Pump/Stability/Power** 1) Backward drag x 4 min continuous 2a) Single leg RDL (unsupported) 2x8-10 2b) Lateral med ball slam 2x3 ea **Main Lifts** 1a) Front squat 3x4-6 @ RPE (8-9) 1b) Seated vertical jump 3x2 (between ramp ups for 1a) 2) Deadlift 1x3, 2x4-6 @ (RPE 8-9) **Accessories** 1a) Tib raise 2x12-15 (F) 1b) Seated calf raise 2x8-10 (F)	**Repeats (mixed distances)** **Run Warmup** Part 1: 5x200m repeats Pace: match/1-2 sec faster than phase 1 200s Rest: 1:1 work:rest --Rest 2:00 after last 200-- Part 2: 4x400m repeats Pace: *10-15 sec/mi faster than pre program 2mi TT Rest: 1:1 work: rest --rest 3:00 after last 400-- Part 3: 2x600m repeats Pace: *5-8 sec/mi faster than pre program 2mi TT Rest: 1:1 work:rest 5-8 min easy run or walk/run cooldown Goal (all repeats): repeatable pace, last lap best lap *see notes for pacing 400s & 600s	**Prep:** add/subtract/adjust lower warmup as needed **Pump/Stability/Power:** Drag: aiming for light bloodflow/pump 2a, b) RDL is LIGHT, easy. Not working sets. Slams: 12-20# ball (watch face!) Rest ~45-60 sec between SLRDL & slams **Main Lifts: (rest 2-4 minutes between main movement sets)** Front squats or SSB squats acceptable Conventional, sumo or hex bar all options for DL Set 1: work to a heavy triple @ 8-9 RPE (base effort on feel) Set 2 & 3: backoffs - drop load by 14-17% & hit 4-6 E.g. if you hit a top triple at 405#, backoff set range would be ~335-350# (base on feel) **Accessories:** Calves/tibs, hold stretches for 2-3 sec/rep **Repeats:** can be done immediately after lifting or later in the day. Stick to pacing parameters *Pacing: if you ran a 12:00 2 mi pre-program (6:00/mi), you'll run 400s at a 5:45-5:50 pace (1:25-1:28 w/ +/- 1 sec padding), 600s at a 5:50-5:55 pace (2:10-2:13 w/ +/- 1 sec padding)

DAY 2 FOCUS
Upper Body

Weight Training	Conditioning	Notes
Prep: Upper warmup **Pump & Power** 1a) Bumper jumping pushups 2x6-8 1b) Band pull apart 2x15-20 (pump) 1c) Lateral med ball slam 2x3 ea **Main Lifts** 1) Barbell or swiss bench clusters 3x3,3,3,3 2) Chest supported row 2x6-8, 1x8+ (RIR 1) 3a) 10-30° Incline DB press 2x6-8 (RIR 1-2) 3b) Rack chins 2x8-10 (1 RIR) **Core** 1a) Suitcase carry 3x50 yd each hand 1b) Roman chair raises 3x10-12 (F)	**None**	**Prep:** add/subtract/adjust warmup as needed (do warmup pre-jumps/tosses) Rest: 90 seconds between a & b Max effort pushups: can opt to increase plate height over weeks Lateral ball slam: use 12-20 lbs med ball. Use caution if it's a bouncy one **Pump/Power:** goal is to get a pump in upper back, chest 1a, b, c) rest ~2 min between jump pushups & slams - do band PAs sometime during rest **Main Lifts: (rest 2-4 min between sets)** Choose barbell or swiss bar for main bench movement (can use DBs if bench bothers shoulders) Clusters (see intro for more): using ~your 8RM, hit 3 sets of 4 triple clusters w/ ~15 sec between mini sets (3 min rest minimum between clusters) CS row can be machine, T-bar, or DBs (ideally different from last block) Note incline degree of incline press Rack chins optimally done w/ rings, D handles or angles 90s Add med ball, plate or DB to lap to load **Core:** suitcase carries should be 7/10 effort, slow & controlled, upright posture Leg raises: tempo manipulated to make 10-12 reps hard (can add load between feet)

DAY 3 FOCUS
Strongman or Tempo

Weight Training	Conditioning	Notes
None	**Strongman** Buy in: 50 calorie row, bike, OR ski Then: 20 minute running clock (AMRAP) -3x ea OO ground to shoulder -100 yd OO shoulder carry (50 yd right, 50 yd left) -100 yd odd obj zercher/bear hug carry -50yd forward sled drag -50yd backward sled drag -100 yd farmer's walk After 20:00, buy out w/ 50 cal on same machine as buy in Goal: REPEAT X 20 minutes for max rounds Maintainable pace w/o breaks Buy out no more than 10 sec slower than buy in **Option B: Tempo** 8 minute easy run warmup 22:00 tempo run @ match/beat last phase tempo pace	**2 options: Select ONLY 1 (for balanced results, alternate back and forth between tempo and strongman week by week - it's up to you which one you start with)** **Strongman Equipment & Notes:** -1x sled w/ turf, grass, dirt, or "tank" sled on any surface -1x leash/strap that goes around waist for sled (can run dip belt chain thru handles in leiu of waist strap) -1x odd object (OO) - Dball or Sandbag, 40-80# (challenging but appropriate load) -2xKB or DB, 45-60# (challenging but appropriate load) -1x rower, ski erg, airbike OR spin/erg bike Goal: a conditioning stimulus>strength stimulus. Err towards lighter>heavier AMRAP = as many rounds as possible within time domain **Tempo:** Same tempo guidlines as last phase

DAY 4 FOCUS
Lower Body (volume)

Weight Training	Conditioning	Notes
Prep: Lower warmup **Power & Pump** 1a) Skips for distance 2x6 each leg (alternating) 1b) Seated leg curl (leaned forward) 2x 12-15 (0-1 RIR) 1c) Underhand ball toss for height OR distance (SPT) 2x2 throws **Main Lifts** 1) Machine squat 1x6-8, 1x8+ (RIR 1-2) 2) B-stance RDL 2x8-10 ea (RIR 1-2) 3) Leg extensions 2x12-15 (RIR 0) **Core:** 1a) Cross bench ab mat crunch 3x1-2RIR 1b) Front rack carry 3x50 yd	**None**	**Prep:** Skipping for distance, 6 each leg Opt for ball throw for height or distance (depending on goals/space). 10-16# ball **Power & Pump:** 1a, b, c) do skips, rest ~60 sec, leg curl rest ~60 sec, *throws, rest ~60 sec, repeat *Rest at least 30 sec between individual med ball throws **Main Lifts: (rest 2-4 minutes between main movement sets)** Machine squat - different machine from last block recommended Set 1&2, a hard 6-8 for top sets, set 3, decrease load a bit (10-20%) and hit a st of 8+ closer to failure (somewhere in the 9-15 rep range ideally) **Leg extensions** 2 straight sets (alternating between this and myoreps next week). **Core:** Rib cage to pelvis for crunches Front rack carry RPE ~7

DAY 5 FOCUS
Upper Body (volume)
Metcon

Weight Training	Conditioning	Notes
Prep: Upper warmup **Main Lifts** 1) Machine chest press 2x6-8, 1x8+ (1RIR) 2) Chest supported T-bar row 3x10-12 (1RIR) 3a) Deficit pushups 2x 8-12 (1RIR) 3b) Neutral grip chins 2x1RIR **Arm Farm (all: set 1: 0RIR, set 2: F)** 1a) Close grip pushup 2x10-15 1b) DB rear delt fly 2x10-15 2a) Overhead rope extension 2x10-15 2b) Rope cable curl 2x10-15 3a) Leaned back lateral raise 2x8-10 3b) Incline bench curl 2x8-10	**Metcon (option A)** AMRAP x 15 min 25 cal row, bike or ski 6xKB cleans 6xKB push press 6xKB front squats Goal: complete as many rounds as possible in 15 min **Metcon (Option B)** 150 calorie row for time Every 2:00 including 0: get off rower and do 5 man makers	**Prep:** Add/subtract/adjust warmup as needed (do warmup pre-jumps/tosses) Rest: 90 seconds between a & b KB cleans: very light, focuing on external shoulder rotation, not super heavy post chain stim BUP: start light. using chalk helps **Main lifts: Rest 2-4 min between sets, 60-90 sec between stagger sets)** Chest press: select any press machine - horizontal or slight incline preferred CS T-bar: if no access, select another CS row from exercise lib Def PU: 3-4 sec eccentric, pause 1 sec w/ chest just off floor. add load if needed Chins: NG or angles 90s, slow eccentric (3-4 sec), dead hang - BW only **Arm Farm: (Rest 30-45 sec or as needed between pairing)** Goal is to use same machine for each pairing Use pristine form for all arm movements **Conditioning: (choose ONLY 1)** Metcon A: use a KB load you can do 10-12 push presses w/ while fresh Metcon b: use DBs you can hit 8 at a 6-7 RPE w/ while fresh (KBs ok but not best option) Run: same tempo pacing PACE plan as phase 1

DAY 6 FOCUS
Aerobic Conditioning

Weight Training	Conditioning	Notes
None	**Long Run** 80 minute long run, aerobic effort	**Aerobic Run (Zone 2)** Measurement options: P: Conversational pace A: Nasal breathing C: HR: MAF 180 or 65-70% of MHR if known E: RPE 4-5 E:"Easy" Optimal: pick 2 and use them weekly *Running not required - can opt for alternative zone 2 implement if desired

DAY 7 REST

Weight Training	Conditioning	Notes
None	**None**

PHASE 2 | WEEK 2

DAY 1 FOCUS
Lower Body (low volume)
Repeats

Weight Training	Conditioning	Notes
Prep Lower warmup **Pump/Stability/Power** 1) Backward drag x 4 min continuous 2a) Single leg RDL (unsupported) 2x8-10 2b) Lateral med ball slam 2x3 ea **Main Lifts** 1a) Front squat 3x4-6 @ RPE (8-9) 1b) Seated vertical jump 3x2 (between ramp ups for 1a) 2) Deadlift 1x3, 2x4-6 @ (RPE 8-9) **Accessories** 1a) Tib raise 2x12-15 (F) 1b) Seated calf raise 2x8-10 (F)	**Repeats (mixed distances)** **Run Warmup** Part 1: 6x200m repeats Pace: match/beat last week pace Rest: 1:1 work:rest --Rest 2:00 after last 200-- Part 2: 4x400m repeats Pace: match/beat last week pace Rest: 1:1 work: rest --rest 3:00 after last 400-- Part 3: 2x600m repeats Pace: match/beat last week pace Rest: 1:1 work:rest Goal (all repeats): repeatable pace, last lap best lap 5-8 min easy run or walk/run cooldown	**Prep:** refer to week 1 intent/rest **Pump/Stability/Power:** refer to week 1 for intent/rest **Main Lifts: (Rest 2-4 minutes between main movement sets)** Squat: double progression DL: goal is to add 5-10lbs for top set, then EITHER a rep total to the backoffs OR 5-10 lbs & match reps (DON'T FORCE IT - refer to autoregulation in intro) **Repeats:** can be done immediately after lifting or later in the day. Stick to pacing parameters

DAY 2 FOCUS
Upper Body

Weight Training	Conditioning	Notes
Prep Upper warmup **Pump & Power** 1a) Bumper jumping pushups 2x6-8 1b) Band pull apart 2x15-20 (pump) 1c) Lateral med ball slam 2x3 ea **Main Lifts** 1) Barbell or swiss bench clusters 3x3,3,3,3 2) Chest supported row 2x6-8, 1x8+ (RIR 1) 3a) 10-30° Incline DB press 2x6-8 (RIR 1-2) 3b) Rack chins 2x8-10 (1, 0 RIR) **Core** 1a) Suitcase carry 3x50 yd each hand 1b) Roman chair raises 3x10-12 (F)	**None**	**Prep:** refer to week 1 intent/rest **Pump work:** refer to week 1 for intent/rest **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** Same bar for bench as as week 1 If last week's bench effort was sub 8RPE, add 5-10# Same CS row Rack chins - 0 RIR set 2 **Core Work:** see week 1 for intent Carries - stick to same load unless it was sub 7/10 RPE Roman chair: aim for another rep or 2

DAY 3 FOCUS
Strongman or Tempo

Weight Training	Conditioning	Notes
None	**Option A: Strongman** Buy in: 50 calorie row, bike, OR ski 25 minute running clock (AMRAP) 3x ea OO ground to shoulder into 100 yd OO shoulder carry (50 yd right, 50 yd left) 100 yd odd obj zercher/bear hug carry 50yd forward sled drag 50yd backward sled drag 100 yd farmer's walk After 25:00, buy out w/ 50 cal on same machine as buy in **Option B: Tempo** 8 minute easy run warmup 24:00 tempo run @ match/beat last week tempo pace	**2 options: Select ONLY 1** **Strongman Equipment & notes:** See week 1 **Goal:** REPEAT X 25 minutes for max rounds Maintainable pace w/o breaks Buy out no more than 10 sec slower than buy in + beat last week's #s **Tempo:** Same tempo guidlines as last phase Suggest 20:00 if you did strongman last week

DAY 4 FOCUS
Lower Body (volume)

Weight Training	Conditioning	Notes
Prep Lower warmup **Power & Pump** 1a) Skips for distance 2x6 each leg (alternating) 1b) Seated leg curl (leaned forward) 2x 12-15 (0-1 RIR) 1c) Underhand ball toss for height OR distance (SPT) 2x2 throws **Main Lifts** 1) Machine squat 1x6-8, 1x8+ (RIR 1-2) 2) B-stance RDL 2x8-10 ea (RIR 1-2) 3) Leg extensions 2xmyo rep match (12-15) **Core** 1a) Cross bench ab mat crunch 3x1-2RIR 1b) Front rack carry 3x50 yd	**None**	**Prep:** refer to week 1 intent/rest **Power & Pump:** refer to week 1 for intent/rest Leg curl double progression Throws: reps remain same, goal is more distance and/or increase ball load every ~2 weeks by 2# **Main Lifts: (Rest 2-4 minutes between main movement sets)** Same squat machine Leg ext. myorep match (see intro), 2 sets **Core work:** refer to week 1 for intent Optional: increase load 2.5-5# for FR carries

DAY 5 FOCUS
Upper Body (volume)
Metcon

Weight Training	Conditioning	Notes
Prep Upper warmup **Main Lifts** 1) Machine chest press 2x6-8, 1x8+ (0-1RIR) 2) Chest suppt T-bar row 3x10-12 (0RIR) 3a) Deficit pushups 2x 8-12 (0 RIR) 3b) Neutral grip chins 2x1RIR **Arm Farm (all: set 1: 0RIR, set 2: F)** 1a) Close grip pushup 2x10-15 1b) DB rear delt fly 2x10-15 2a) Overhead rope extension 2x10-15 2b) Rope Cable curl 2x10-15 3a) Leaned back lateral raise 2x8-10 3b) Incline bench curl 2x8-10	**Metcon (option A)** AMRAP x 15 min 25 cal row, bike or ski 6xKB cleans 6xKB push press 6xKB front squats Goal: beat last week's effort **Metcon (Option B)** 150 calorie row for time Every 2:00 including 0: get off rower and do 5 man makers Goal: beat last week's effort	**Prep:** see week 1 for intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** See week 1 for intent Same press, row variant as week 1 **Arm Farm: (Rest 30-45 sec or as needed between pairing)** Same setups/execution as week 1 **Conditioning: (choose ONLY 1)** Can rotate into another metcon or run if desired, or stick to beating previous week

DAY 6 FOCUS
Aerobic Conditioning

Weight Training	Conditioning	Notes
None	**Ruck** 80 minute ruck, fastest walking pace	Rucking not required - if opting to run or another form of conditioning, do 90 minutes Ruck weight Same as ruck 2, or no more than + 5 lbs from last ruck (50 lbs is suggested max for anyone)

DAY 7 REST

Weight Training	Conditioning	Notes
None	**None**	

© Terminator Training Method, all rights reserved.

PHASE 2 | WEEK 3

DAY 1 FOCUS
Lower Body (low volume)
Repeats

Weight Training	Conditioning	Notes
Prep Lower warmup **Pump/Stability/Power** 1) Backward drag x 4 min continuous 2a) Single leg RDL (unsupported) 2x8-10 2b) Lateral med ball slam 2x3 ea **Main Lifts** 1a) Front Squat 3x4-6 @ RPE (8-9) 1b) Seated vertical jump 3x2 (between ramp ups for 1a) 2) Deadlift 1x2, 2x3-5 @ (RPE 8-9) **Accessories** 1a) Tib raise 2x12-15 (F) 1b) Seated calf raise 2x8-10 (F)	**Repeats (mixed distances)** **Run Warmup** Part 1: 6x200m repeats Pace: match/beat last week pace Rest: 1:1 work:rest --Rest 2:00 after last 200-- Part 2: 5x400m repeats Pace: match/beat last week pace Rest: 1:1 work: rest --rest 3:00 after last 400-- Part 3: 2x600m repeats Pace: match/beat last week pace Rest: 1:1 work: rest Goal (all repeats): repeatable pace, last lap best lap 5-8 min easy run or walk/run cooldown	**Prep:** refer to week 1 intent/rest **Pump/Stability/Power:** Refer to week 1 intent/rest Optional: add load to drag, same intent **Main Lifts: (Rest 2-4 minutes between main movement sets)** Squat - double progression DL: work to top DOUBLE at an 8-9 RPE (on feel) Backoffs: w/ 13-16% of top double, hit 2x3-5 **Repeats:** can be done immediately after lifting or later in the day. Stick to pacing parameters

DAY 2 FOCUS
Upper Body

Weight Training	Conditioning	Notes
Prep Upper warmup **Pump & Power** 1a) Bumper jumping pushups 2x6-8 1b) Band pull apart 2x15-20 (pump) 1c) Lateral med ball slam 2x3 ea **Main Lifts** 1) Barbell or swiss bench clusters 3x4,4,3,3 2) Chest supported row 2x6-8, 1x8+ (RIR 1) 3a) 10-30° Incline DB press 2x6-8 (RIR 1-2) 3b) Rack chins 2x8-10 (1, 0 RIR) **Core** 1a) Suitcase carry 3x50 yd each hand 1b) Roman chair raises 3x10-12 (F)	**None**	**Prep:** refer to week 1 intent/rest **Pump work:** refer to week 1 for intent/rest Can add load to face pulls or SA plate raise as desired, sticking w/ intent **Main Lifts: (rest 2-4 min between sets, 60-90 sec between stagger sets)** Same bar for bench as week 1 If last week's effort was sub 8RPE, add 5# (more reps in cluster 3&4) If higher, stick to same load. If barely hit it, drop load as needed Rack chins - 0 RIR set 2 **Core Work:** see week 1 for intent Carries - add 2.5-5# Roman chair: aim for another rep or 2

DAY 3 REST

Weight Training	Conditioning	Notes
None	**None**	

DAY 4 FOCUS
Lower Body (volume)

Weight Training	Conditioning	Notes
Prep Lower warmup **Power & Pump** 1a) Skips for distance 2x8 each leg (alternating) 1b) Seated leg curl (leaned forward) 2x 12-15 (0 RIR) 1c) Underhand ball toss for height OR distance (SPT) 2x2 throws **Main Lifts** 1) Machine squat 1x6-8, 1x8+ (RIR 1-2) 2) B-stance RDL 2x8-10 ea (RIR 1-2) 3) Leg extensions 2x12-15 (RIR 0, F) **Core** 1a) Cross bench ab mat crunch 3x0-1RIR 1b) Front rack carry 3x50 yd	**None**	**Prep:** refer to week 1 intent/rest **Power & Pump:** refer to week 1 for intent/rest Leg curl double progression **Main Lifts: (Rest 2-4 minutes between main movement sets)** Same squat machine Leg ext - no myoreps. for set 2, drop load a bit if needed to land in rep range **Core work:** refer to week 1 for intent Optional: increase load 2.5-5# for FR carries

DAY 5 FOCUS
Upper Body (volume)
Metcon

Weight Training	Conditioning	Notes
Prep Upper warmup **Main Lifts** 1) Machine chest press 2x6-8, 1x8+ (1, 0, 0RIR) 2) Chest support T-bar row 3x10-12 (0, 0, F RIR) 3a) Deficit pushups 2x 8-12 (0, F RIR) 3b) Neutral grip chins 2x1, 0RIR **Arm Farm (all: set 1: 0RIR, set 2: F - see notes for intensity techs)** 1a) Overhead rope extension 2x10-15 1b) Rope cable curl 2x10-15 2a) Leaned back lateral raise 2x8-10 2b) Incline bench curl 2x8-10 3a) Close grip pushup 1x10-15, 1x10-15 +3,2,2 3b) DB rear delt fly 1x10-15, 1x10-15.2-3	**Metcon (option A)** EMOM x 18 min 0: 12 no jump burpees 1: 15 cal row 2: 15 cal ski **Metcon (Option B)** 150 calorie **airbike** for time Every 4:00 including 0: row or ski x 250 m Goal: esablish baseline time to beat **Runner Option** 30 minute run w/ 5x30 second pickups to tempo pace	**Prep:** see week 1 for intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** See week 1 for intent Same press, row variant as week 1 **Arm Farm: (Rest 30-45 sec or as needed between pairing)** Same setups/execution as week 1 Note different order due to intensity techniques 3a = after set 2, rest/pause (same load, 15-20 sec rest between r/p sets) 3b = after failure on set 2, 2-3 partials **Conditioning: (choose ONLY 1)** Can rotate into another metcon or run if desired, or stick to beating previous week Runner option: in place of typical Wednesday tempo

DAY 6 FOCUS
Aerobic Conditioning

Weight Training	Conditioning	Notes
None	**Long Run** 95 minute long run, aerobic effort	**Aerobic Run (Zone 2)** Measurement options: P: Conversational pace A: Nasal breathing C: HR: MAF 180 or 65-70% of MHR if known E: RPE 4-5 E:"Easy" Optimal: pick 2 and use them weekly *Running not required - can opt for alternative zone 2 implement if desired

DAY 7 REST

Weight Training	Conditioning	Notes
None	**None**	

© Terminator Training Method, all rights reserved.

PHASE 2 | WEEK 4

DAY 1 FOCUS
Lower Body (low volume)
Repeat
Alternative

Weight Training	Conditioning	Notes
Prep Lower warmup **Pump/Stability/Power** 1) Backward drag x 5 min continuous 2a) Single leg RDL (unsupported) 2x8-10 2b) Lateral med ball slam 2x3 ea **Main Lifts** 1a) Front squat 3x4-6 @ RPE (8-9) 1b) Seated vertical jump 3x2 (between ramp ups for 1a) 2) Deadlift 1x2, 2x3-5 @ (RPE 8-9) **Accessories** 1a) Tib raise 2x12-15 (F) 1b) Seated calf raise 2x8-10 (F)	**Non Repeat Week** 35 minute run w/ 5x45 second pickups to tempo pace Or Aerobic intervals (airbike, rower or ski) 10 minutes easy warmup 24:00 of :15 hard (RPE 7-8), 1:15 easy (RPE 2-3) 10 minutes easy cooldown	**Prep:** refer to week 1 intent/rest **Pump/Stability/Power:** Refer to week 1 intent/rest **Main Lifts: (Rest 2-4 minutes between main movement sets)** Squat - double progression DL: work to top DOUBLE at an 8-9 RPE (on feel) Backoffs: w/ 13-16% of top double, hit 2x3-5 **Repeats:** can be done immediately after lifting or later in the day. Stick to pacing parameters

DAY 2 FOCUS
Upper Body

Weight Training	Conditioning	Notes
Prep Upper warmup **Pump & Power** 1a) Bumper jumping pushups 2x6-8 1b) Band pull apart 2x15-20 (pump) 1c) Lateral med ball slam 2x3 ea **Main Lifts** 1) Barbell or swiss bench clusters 3x4,4,4,4 2) Chest support row 2x6-8, 1x8+ (RIR 1) 3a) 10-30° Incline DB press 2x6-8 (RIR 1-2) 3b) Rack chins 1x8-10 (1 RIR), 1x 8-10 (0 RIR) + drop **Core** 1a) Suitcase carry 3x50 yd each hand 1b) Roman chair raises 3x10-12 (F)	**None**	**Prep:** refer to week 1 intent/rest **Pump Work:** refer to week 1 for intent/rest Can add load to face pulls or SA plate raise as desired, sticking w/ intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** Same bar for bench as week 1 If last week's effort was sub 8RPE, add 5# (more reps in cluster 3&4) If higher, stick to same load. If barely hit it, drop load as needed Same CS row, dip, chin up variation Rack chins: after hitting 0RIR on set 2, drop weight from lap, start drop set w/ BW within 20 seconds, max reps to failure (likely only + 1-3 reps) **Core Work:** see week 1 for intent Carries - stick to same load unless it was sub 7/10 RPE Roman chair: aim for another rep or 2

DAY 3 FOCUS
Strongman or Tempo

Weight Training	Conditioning	Notes
None	**Option A: Strongman Work** Part 1: sandbag ground to shoulder (GTO) x 4:00 continuous (alternating shoulders) –Rest 2:00– Part 2: sandbag zercher carry x 6:00 for max distance (resting as needed) –Rest 2:00– Part 3: farmer's carry :45 on, :45 rest x 6 rounds –Rest 2:00– max duration plank hold **Option B: Tempo** 8 minute easy run warmup 26:00 tempo run @ match/beat last tempo pace	**2 options: Select ONLY 1** **Strongman Equipment & notes:** Equipment: sandbag 50-100#, 2x45-70# KBs (common sense rule!) Part 1: running clock, pace yourself. goal is minimal rest Part 2: running clock, rest as needed Part 3: choose carry load that won't require rest minus the prescribed rest periods **Tempo:** Same tempo guidlines as last phase

DAY 4 FOCUS
Lower Body (volume)

Weight Training	Conditioning	Notes
Prep Lower warmup **Power & Pump** 1a) Skips for distance 2x8 each leg (alternating) 1b) Seated leg curl (leaned forward) 2x 12-15 (F) 1c) Underhand ball toss for height OR distance (SPT) 2x2 throws **Main Lifts** 1) Machine squat 1x6-8, 1x8+ (RIR 1) 2) B-stance RDL 2x8-10 ea (RIR 1-2) 3) Leg extensions 2xmyo rep match (12-15) **Core** 1a) Cross bench ab mat crunch 3x0-1RIR 1b) Front rack carry 3x50 yd	**None**	**Prep:** refer to week 1 intent/rest **Power & Pump:** refer to week 1 for intent/rest Leg curl double progression **Main Lifts: (Rest 2-4 minutes between main movement sets)** Same squat machine Leg ext. myorep match (see intro), 2 sets Goal is same load as week 2, but more reps in set 1 or fewer myorep sets (or both) e.g. if in week 2 (this phase) you hit 140 for 13, then 140 for 7, 3, 2, 1 this week you'll use 140 and aim to hit something like 15 (set 1), then 10, 3, 2 **Core work:** refer to week 1 for intent Optional: increase load 2.5-5# for FR carries

DAY 5 FOCUS
Upper Body (volume)
Metcon

Weight Training	Conditioning	Notes
Prep Upper warmup **Main Lifts** 1) Machine chest press 2x6-8, 1x8+ (1, 0, F RIR) 2) Chest support T-bar row 3x10-12 (0, 0, F RIR) 3a) Deficit pushups 2x 8-12 (F) 3b) Neutral grip chins 2x1, F RIR **Arm Farm (all: set 1: 0RIR, set 2: F - see notes for intensity techs)** 1a) Close grip pushup 2x10-15 1b) DB rear delt fly 2x10-15 2a) Overhead rope extension 2x10-15 2b) Rope cable curl 2x10-15 3a) Leaned back lateral raise 2x8-10 +3,2,2 3b) Incline bench curl 1x8-10, 1x8-10 + mech drop	**Metcon (option A)** EMOM x 18 min 0: 12 no jump burpees 1: 15 cal row 2: 15 cal ski **Metcon (Option B)** 150 calorie **airbike** for time Every 4:00 including 0: row or ski x 250 m Goal: beat last week's time	**Prep:** see week 1 for intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets)** See week 1 for intent Same press, row variant as week 1 **Arm Farm: (Rest 30-45 sec or as needed between pairing)** Same setups/execution as week 1 Intensity techniques After 2nd set of laterals, rest/pause (same load, 15-20 sec rest between r/p sets) After 2nd set of incline bench curls, using the same DBs, stand up and do DB curls to failure. By standing, you're getting a mechanical advantage and should be able to hit 1-3 more reps (pro tip - do them alternating) **Conditioning: (choose ONLY 1)** Can rotate into another metcon or run if desired, or stick to beating previous week

DAY 6 FOCUS
Aerobic Conditioning

Weight Training	Conditioning	Notes
None	**Ruck** 90 minute ruck, fastest walking pace	Rucking not required - if opting to run or another form of conditioning, do 100-105 minutes Ruck weight Same as last ruck, or no more than + 5 lbs from last ruck (50 lbs is suggested max for anyone)

DAY 7 REST

Weight Training	Conditioning	Notes
None	**None**	

© Terminator Training Method, all rights reserved.

PHASE 2 | WEEK 5

DAY 1 FOCUS
Lower Body (low volume)
Repeats

Weight Training	Conditioning	Notes
Prep Lower warmup **Pump/Stability/Power** 1) Backward drag x 5 min continuous 2a) Single leg RDL (unsupported) 2x8-10 2b) Lateral med ball slam 2x3 ea **Main Lifts** 1a) Front squat 3x4-6 @ RPE (8-9) 1b) Seated vertical jump 3x2 (between ramp ups for 1a) 2) Deadlift 1x1, 2x2-4 @ (RPE 8-9) **Accessories** 1a) Tib raise 2x12-15 (F) 1b) Seated calf raise 2x8-10 (F)	**Repeats (mixed distances)** **Run Warmup** Part 1: 6x200m repeats Pace: match/beat last week pace Rest: 1:1 work:rest --Rest 2:00 after last 200-- Part 2: 4x400m repeats Pace: match/beat last week pace Rest: 1:1 work: rest --rest 3:00 after last 400-- Part 3: 3x600m repeats Pace: match/beat last week pace Rest: 1:1 work: rest Goal (all repeats): repeatable pace, last lap best lap 5-8 min easy run or walk/run cooldown	**Prep:** refer to week 1 intent/rest **Pump/Stability/Power:** Refer to week 1 intent/rest **Main Lifts: (Rest 2-4 minutes between main movement sets)** Squat - double progression DL: work to top single at an 8-9 RPE (on feel) Backoffs: w/ 12-15% of top single, hit 2x2-4 **Repeats:** can be done immediately after lifting or later in the day. Stick to pacing parameters

DAY 2 FOCUS
Upper Body

Weight Training	Conditioning	Notes
Prep Upper warmup **Pump & Power** 1a) Bumper jumping pushups 2x6-8 1b) Band pull apart 2x15-20 (pump) 1c) Lateral med ball slam 2x3 ea **Main Lifts** 1) Barbell or swiss bench clusters 3x4,4,4,4 (last set, last cluster: 4+) 2) Chest support row 2x6-8, 1x8+ (RIR 1) 3a) 10-30° Incline DB press 2x6-8 (RIR 1-2) 3b) Rack chins 1x8-10 (1 RIR), 1x 8-10 (0 RIR) + drop **Core** 1a) Suitcase carry 3x50 yd each hand 1b) Roman chair raises 3x10-12 (F)	**None**	**Prep:** refer to week 1 intent/rest **Pump work:** refer to week 1 for intent/rest Can add load to face pulls or SA plate raise as desired, sticking w/ intent **Main Lifts: (Rest 2-4 min between sets, 60-90 sec between stagger sets):** Same bar for bench as week 1 Use same load as last week (if you completed all clusters) Last mini cluster of LAST SET ONLY, hit 4+ to ~9+ RPE (use a spotter) Same CS row Rack chins: after hitting 0RIR on set 2, drop weight from lap, start drop set w/ BW within 20 seconds, max reps to failure **Core Work:** see week 1 for intent Carries - add 2.5-5# Roman chair: aim for another rep or 2

DAY 3 FOCUS
Strongman or Tempo

Weight Training	Conditioning	Notes
None	**Strongman Work** Part 1: sandbag ground to shoulder (GTO) x 4:00 continuous (alternating shoulders) –Rest 2:00– Part 2: sandbag zercher carry x 6:00 for max distance (resting as needed) –Rest 2:00– Part 3: farmer's carry :45 on, :45 rest x 6 rounds –Rest 2:00– max duration plank hold **Option B: Tempo** 8 minute easy run warmup 28:00 tempo run @ match/beat last tempo pace	**2 options: Select ONLY 1** **Strongman Equipment & notes:** Use the same loads as last week or add small amounts if necessary Goal is to beat last week's results If carries weren't challenging enough, you can add load **Tempo** Same tempo guidlines as last phase

DAY 4 FOCUS
Lower Body (volume)

Weight Training	Conditioning	Notes
Prep Lower warmup **Power & pump** 1a) Skips for distance 2x8 each leg (alternating) 1b) Seated leg curl (leaned forward) 2x 12-15 (0-1 RIR) 1c) Underhand ball toss for height OR distance (SPT) 2x2 throws **Main Lifts** 1) Machine squat 1x6-8, 1x8+ (RIR 1) 2) B-stance RDL 2x8-10 ea (RIR 1-2) 3) Leg extensions 2x12-15 (RIR 0, F) **Core** 1a) Cross bench ab mat crunch 3x0RIR 1b) front rack carry 3x50 yd	**None**	**Prep:** refer to week 1 intent/rest **Power & Pump:** refer to week 1 for intent/rest leg curl double progression **Main Lifts: (Rest 2-4 minutes between main movement sets)** Same squat machine leg ext - no myoreps. for set 2, drop load a bit if needed to land in rep range **Core Work:** refer to week 1 for intent Optional: increase load 2.5-5# for FR carries

DAY 5 FOCUS
Upper Body (volume)

Weight Training	Conditioning	Notes
Prep Upper warmup **Main Lifts** 1) Machine chest press 2x6-8, 1x8+ (1, 0, F) 2) Chest support T-bar row 3x10-12 (0, F, F) 3a) Deficit pushups 2x 8-12 (F, F.1-2) 3b) Neutral grip chins 2x0, F RIR **Arm Farm (all: set 1: 0RIR, set 2: F - see notes for intensity techs)** 1a) Overhead rope extension 2x10-15 1b) Rope cable curl 2x10-15 2a) Leaned back lateral raise 2x8-10 2b) Incline bench curl 2x8-10 3a) Close grip pushup 1x10-15, 1x10-15 +3,2,2 3b) DB rear delt fly 1x10-15, 1x10-15.2-3	**None**	**Prep:** see week 1 for intent **Main Lifts: (rest 2-4 min between sets, 60-90 sec between stagger sets)** See week 1 for intent Same press, row variant as week 1 1-2 partials on def pushups **Arm Farm: (rest 30-45 sec or as needed between pairing)** Same setups/execution as week 1 Note different order due to intensity techniques 3a = after set 2, rest/pause (same load, 15-20 sec rest between r/p sets) 3b = after failure on set 2, 2-3 partials **Conditioning: (choose ONLY 1)** Can rotate into another metcon or run if desired, or stick to beating previous week

DAY 6 FOCUS
Aerobic Conditioning

Weight Training	Conditioning	Notes
None	**Long Run** 45-60 minute long run (dialing back going into final phase)	**Aerobic Run (Zone 2)** Measurement options: P: Conversational pace A: Nasal breathing C: HR: MAF 180 or 65-70% of MHR if known E: RPE 4-5 E:"Easy" Optimal: pick 2 and use them weekly *Running not required - can opt for alternative zone 2 implement if desired

DAY 7 REST

Weight Training	Conditioning	Notes
None	**None**	

© Terminator Training Method, all rights reserved.

PHASE 3 | WEEK 1

	Weight Training	Conditioning	Notes
DAY 1 FOCUS *Push + 1 Quad Tempo Pickup Run*	**Prep** Full warmup **Power** a) Jumping pushups 3x5-7 b) Pogos w/ high hops 3x5 (jump high every 2-3 hops - 5 high hops) **Main Lifts** 1) Incline BB/swiss/smith rpess 3x6-8 (1-2 RIR) 2) Chain dips 6, 4, 2, BW (1-2 RIR, BW x 1 RIR) 3) Cable or machine fly 2x6-8 (1 RIR) 4) Walking lunge (quad bias) 2x10-12 (1 RIR) **Arms/Shoulder (stagger sets)** a) Cable lateral 2x10-12 (0 RIR) b) Cable crossover tri-ext 2x10-12 (0 RIR) c) Farmer's walk 3 x 50 yd (RPE 7-8)	**Run w/ Tempo Pickups** 35 minute easy run At minute 8 & 15, increase to tempo pace & hold for 2:00 At minute 22, increase to 5 mile pace and hold for 4:00 It'll look like: 8 min easy, 2 min tempo, 5 min easy, 2 min tempo, 5 min easy, 4:00 @ 5 mile pace, 9 min easy	**Prep:** add/subtract/adjust lower warmup as needed (do warmup pre-jumps) **Power:** Rest: 60-90 seconds between a & b Max effort jumps on pushups (use floor or box) Pogos max jump height on the high jumps, minimize knee bend **Main Lifts: (Rest 2-4 minutes between main movement sets)** Choose barbell or swiss bar for main bench movement (can use DBs if bench bothers shoulders) Chain dips optional, can use dead weight or BW Cable/machine fly slow & controlled, lower reps. Emphasize stretch quad biased walking lunge = upright torso, shorter step, knee over toe. Load however you want Rest 3-4 minutes between main movement sets. **Arms/shoulder:** (rest as needed/60ish sec between movements) Same machine for laterals and extensions If no dual cable, hit singe arm or DBs for laterals, rope for triceps **Conditioning:** shorter tempo portions to allow better performance on wed repeats
DAY 2 FOCUS *Pull w/ Hams*	**Prep** Full warmup **Power** a) KB swing 3x5 (heavy/power focus) b) Box jump 3x3 **Main Lifts** 1) Bent row (DB or BB) 3x6-8 (1-2 RIR) 2) Lat pulldown 2x8-10 (1 RIR) 3) Chest support T-Bar or DB row 2x8-10 (0-1 RIR) 4) Glute ham raise 2x1-2 RIR (1-2 RIR) **Arms/Core** a) Preacher curl 3x8-10 (1 RIR) b) Bench reverse crunch 3x10-15 (F) **Optional Calves/Tibs** Tibs/calf raises (optional) 2-3x8-15 ea	**Rest**	**Prep:** add/subtract/adjust warmup as needed (do warmup pre-jumps/tosses) Rest: 90 seconds between a & b KB swing, heavy and powerful (can do some lighter ones to prep) Box jump - max jump, NOT max box height. See phase 1 for considerations **Main Lifts: (Rest 2-4 minutes between main movement sets)** Bent Row: can use a barbell or dumbbells Lat pulldowns - grip/set up of choice (I prefer neutral/shoulder width) T-bar row can be subbed w/ DB or machine CS row Glute ham raise - if not proficient, can do a leg curl or RDL variation **Arms: (Super or stagger sets)** Preacher - can be machine or EZ bar or single arm DB (use caution at bottom - steeper bench is usually best) Bench rev crunch, slow & controlled
DAY 3 FOCUS *Repeats*	**None**	**Repeats (mixed distances)** **Run Warmup** Part 1: Run 1 mile at RPE 9 Rest 4:00 Part 2: run 2x800 @ 6-8 sec/mi faster than 1 mi Rest 3:00 Part 3: run 3x400, leisurely walk 100 @ 3-5 sec/mi faster than avg 800 splits 5-8 min jog/walk cooldown Goal (all repeats): nail the pacing	**Repeats:** Stick to pacing prescriptions, should be a killer session. If you run the mile too hard, you'll know it later in the session. **Pacing Example (#s arbitrary):** Pt1: Mile in 6:20 (9RPE=likely capable of 5:55-6:05 mi) Pt 2: 800s @ 6:12-6:14 pace or 3:06-3:07 (+/- 1 sec buffer aka 3:05-3:08) Result: 3:06, 3:08 - AVG 3:07 (6:14/mi) Pt 3: 400s @ 6:09-6:11/mi or ~1:32-1:34
DAY 4 REST	**None**	**None**	
DAY 5 FOCUS *Lower Body Hypertrophy + Strength Circuit*	**Prep** Lower warmup a) Trap bar jumps 3x3 b) Pogos 3x12 **Pump Work** a) Seated leg curl (leaned forward) 2x 12-14, 10-12 b) Xtra ROM leg Ext 2x 12-14, 10-12 **Main Lifts** 1) SSB or machine squat 1x6-8, 1x8+ 2) Hip thrust 2x6-8 3) Bulgarian split squat 2x8-10 **Core** a) Hanging leg raise 2x10-15 b) 45° side raises 2 x 1RIR	**Conditioning Circuit (3 rounds)** a) Heavy sled push 20 yd b) KB front rack carry 50 yd c) Sandbag/dball GTOS 6 each (alternating) d) Sandbag getups 10 total (5/side) Rest 2:00 between rounds	**Prep:** add/subtract/adjust lower warmup as needed (do warmup pre-jumps) Rest: 90 seconds between a & b TB jumps should be very light, usually w/ empty bar Pogos, no change **Pump Work: Stagger Sets (rest 60-90 sec between movements)** Goal is to get a mean pump in the hams, quads **Main Lifts: (Rest 2-4 minutes between main movement sets, ~90 sec between BSS legs)** Machine squat: hack, pendulum, leg press, belt, smith machine, rogers machine. Suggest using different machine than past phases Set 1: work up to heavy 6-8 w/ 1-2 RIR, then drop load by ~10% and hit a set of 8+ to 1RIR Hip thrust: if you have a machine, use it. It'll save tons of time BSS: load however you'd like. rest between legs **Core work:** Same as previous. can load these if desired Rest as needed **Circuit:** Sled load should be 8-9/10 RPE push (surfaces/sleds vary) Front rack carry ~35-50# kbs Sandbag or dball 50-80#
DAY 6 FOCUS *Upper + Easy Run*	**Upper Warmup** Push 1a) DB front delt press 2x6-8 1b) Kelso shrug 2x10-12 2) Deficit pushup death Set x1 **Armageddon** 1a) Smith JM press 3x8-10 1b) Chins 3x 1RIR 2a) Cable curl 2x10-12 2b) Cable pressdown 2x10-12 Shoulder Shocker (2 rounds, same DBs) a) Straight arm plate raise x F b) Lateral raise x F c) Upright row X F d) Rear delt fly x F	**Options** a) 25 minutes easy run b) 25 minutes easy non/low impact (bike, row, etc) c) 25 minutes of aerobic intervals on bike, rower, curve runner, incline treadmill -5 minutes easy warmup -15 minutes of: :45 easy, :15 hard (RPE 7-8) -5 minutes easy cooldown	**Push: (rest 2-3 min between sets)** Front delt press 60-70° bench Deficit pushup death set: demo video in library **Armageddon: (stagger sets for 1a), 1b), super or stagger for 2a-c)** JM press: recommended on smith w/ rev band, can use DBs or BB Chins BW only - neutral or supine grip, perfect form 2a&b) straight or ez bar suggested, can use rope if desired **Shoulder Shocker:** BB plate for SA plate raise Light DBs for rest, minimal rest between each movement Can do them in whichever order you please Rest ~90 sec between rounds **Conditioning:** all optional - choose based on goals and how you're feeling
DAY 7 FOCUS *Aerobic Conditioning*	**None**	**Long Run** 70 minute long run, aerobic effort (shorter due sat/mon volume/intensity)	**Aerobic Run (Zone 2)** Measurement options: P: Conversational pace A: Nasal breathing C: HR: MAF 180 or 65-70% of MHR if known E: RPE 4-5 E:"Easy" Optimal: pick 2 and use them weekly *Running not required - can opt for alternative zone 2 implement if desired

© Terminator Training Method, all rights reserved.

PHASE 3 | WEEK 2

	Weight Training	Conditioning	Notes
DAY 1 FOCUS *Push + 1 Quad Tempo Pickup Run*	**Prep** Full warmup a) Jumping pushup 3x5-7 b) Pogos w/ high hops 3x5 (jump high every 2-3 hops - 5 high hops) **Main Lifts** 1) Incline BB/swiss press 3x6-8 (1-2 RIR) 2) Chain dips 6, 4, 2, 6 (1-2 RIR) 3) Cable or machine fly 2x6-8 (0 RIR) 4) Walking lunge (quad bias) 2x10-12 (1 RIR) **Arms/shoulder (staggersets)** a) Cable lateral 3x10-12 (F) b) Cable crossover tri-ext 3x10-12 (F) c) Farmer's walk 3 x 50 yd (7-8 RPE)	**Run w/ Tempo Pickups** 35 minute easy run At minute 8 & 15, increase to tempo pace & hold for 2:30 At minute 22, increase to 5 mile pace and hold for 4:30	**Prep:** Refer to week 1 for intent Add/subtract/adjust lower warmup as needed (do warmup pre-jumps) **Power:** see week 1 for intent **Main Lifts: (Rest 2-4 minutes between main movement sets)** DIPS: last set will be 6 w/ load, rather than BW like week 1. Goal is to hit 6 w/ 5-10 lbs less than set 1 Refer to week 1 for intent **Arms/Shoulder: (Rest as needed/60ish sec between movements)** Refer to week 1 for intent **Conditioning:** 0 seconds more at speed
DAY 2 FOCUS *Pull w/ Hams*	**Prep** Full warmup **Power** a) KB swing 3x5 (heavy/power focus) b) Box jump 3x3 **Main Lifts** 1) Cable rows (upper back) 3x8-10 2) RDL 2x6-8 (1-2 RIR) 3) Lat pulldown 2x8-10 (1 RIR) 4) Chest-supported T-Bar or DB row 2x8-10 (0-F RIR) **Arms/Core** a) Preacher curl 3x8-10 (1 RIR) b) Bench reverse crunch 3x10-15 (F) **Optional Calves/Tibs** Tibs/calf raises (optional) 2-3x8-15 ea	**None**	**Prep:** add/subtract/adjust warmup as needed (do warmup pre-jumps/tosses) **Power:** see week 1 for intent Can increase KB swing weight if desired **Main Lifts: (Rest 2-4 minutes between main movement sets)** Cable row replaces bent row (RDL this week) RDL will replace glute ham raise in even weeks (earlier in session due to demand) Refer to week 1 for intent Use same implements/machines as last week **Arms: (Super or stagger sets)** Refer to week 1 for intent
DAY 3 FOCUS *Repeats*	**None**	**Repeats (mixed distances)** **Run Warmup** Part 1: Run 1 mile, goal is 4-8 sec SLOWER than last week's mile (see pt 2) --Rest 5:00-- Part 2: 1 mile, goal is to match or come within 3 sec of last week's 1 mi --Rest 4:00-- Part 3: 3x run 400 @ 6-8 sec/mi faster than part 2 pace (rest=leisurely walk 100m into next rd) Goal: Pacing discipline; possibly paying for your sins last week	**Repeats:** Stick to pacing prescriptions, should be a killer session. If you ran last week's mile too hard, you'll find out on pt. 2 today **Example (arbitrary #s)** Last week's Pt.1 mile time: 6:20 This week's pt 1 goal: 6:24-6:28 (just a target, don't stress missing range by a little) This week's pt 2 goal: 6:17-6:23 (last week was 9 RPE, so you should be able to hit it this week at a higher RPE) Result pt 2.: 6:21 400s paces: 6:13-6:15/mi (~1:32-1:34/400)
DAY 4 REST	**None**	**None**	
DAY 5 FOCUS *Lower Body Hypertrophy + Strength Circuit*	**Prep** Lower warmup a) Trap bar jumps 3x3 b) Pogos 3x12 **Pump Work** a) Seated leg curl (leaned forward) 2x 12-14, 10-12 b) Xtra ROM leg Ext 2x 12-14, 10-12 **Main Lifts** 1) SSB or machine squat 1x6-8, 1x8+ 2) Hip thrust 2x6-8 3) Bulgarian split squat 2x8-10 **Core** a) Hanging leg raise 2x10-15 b) 45° side raises 2 x 1RIR	**Conditioning Circuit (3 rounds)** a) Heavy sled push 20 yd b) KB front rack carry 50 yd c) Sandbag/dball GTOS 7 each (alternating) d) Sandbag getups 10 total (5/side) Rest 2:00 between rounds	**Prep:** add/subtract/adjust lower warmup as needed (do warmup pre-jumps) Rest: 90 seconds between a & b Refer to week 1 for intent **Pump Work: Stagger Sets (rest 60-90 sec between movements)** Refer to week 1 for intent **Main Lifts: (Rest 2-4 minutes between main movement sets, ~90 sec between BSS legs)** Refer to week 1 for intent Same machines/setups for all movements **Core work:** Refer to week 1 for intent **Circuit:** Add 10-15# to sled, 2.5-5# to front rack, do 1 more rep of GTOS
DAY 6 FOCUS *Upper*	**Upper Warmup** Push 1a) DB front delt press 2x6-8 1b) Kelso shrug 2x10-12 2) Deficit pushup death Set x1 **Armageddon** 1a) Smith JM press 3x8-10 1b) Chins 2x 1RIR, 1xF 2a) Cable curl 2x10-12 2b) Cable pressdown 2x10-12 **Shoulder Shocker (2 rounds, same DBs)** a) Straight arm plate raise x F b) Lateral raise x F c) Upright row X F d) Rear delt fly x F	**Options** a) 30 minute easy run b) 30 minutes easy non/low impact (bike, row, etc) c) 30 minutes of aerobic intervals on bike, rower, curve runner, incline treadmill (2-3%) Description: 5 minutes easy warmup 20 minutes of: :45 easy, :15 hard (RPE 7-8) 5 minutes easy cooldown	**Push: (Rest 2-3 min between sets)** Refer to week 1 for intent **Armageddon: (Supersets or stagger sets)** Refer to week 1 for intent **Shoulder Shocker:** Refer to week 1 for intent Can add load or reps **Conditioning:** all optional - choose based on goals and how you're feeling
DAY 7 FOCUS *Long*	**None**	**Ruck** 75 minute ruck, fastest walking pace	Rucking not required - if opting to run or another form of conditioning, do 70-80 minutes Ruck weight Same as last ruck, or no more than + 5 lbs from last ruck (50 lbs is suggested max for anyone)

© Terminator Training Method, all rights reserved.

PHASE 3 | WEEK 3

	Weight Training	Conditioning	Notes
DAY 1 FOCUS *Push + 1 Quad Tempo Pickup Run*	**Prep** Full warmup a) Jumping pushups 3x5-7 b) Pogos w/ high hops 3x5 (jump high every 2-3 hops - 5 high hops) **Main Lifts** 1) Incline BB/swiss press 2x6-8, 1x8+ (1-2 RIR) 2) Chain dips 6, 4, 2, BW (1-2 RIR, BW x 1 RIR) 3) Cable or machine fly 2x6-8 4) Walking lunge (quad bias) 2x10-12 **Arms/Shoulder (Stagger sets)** a) Cable lateral 3x10-12 b) Cable crossover tri-ext 3x10-12 c) Farmer's walk 3 x 50 yd	**Run w/ Tempo Pickups** 40 minute easy run At minute 7 & 17, increase to tempo pace & hold for 3:00 At minute 25, increase to 5 mile pace and hold for 5:00	**Prep:** Refer to week 1 for intent add/subtract/adjust lower warmup as needed (do warmup pre-jumps) **Power:** see week 1 for intent **Main Lifts: (Rest 2-4 minutes between main movement sets)** Bench: 1st 2 sets 6-8, set 3 backoff w/ ~10% less load to 8+ reps Dips: same as week 1 Refer to Week 1 for intent **Arms/shoulder: (Rest as needed/60ish sec between movements)** Refer to week 1 for intent **Conditioning:** 90 seconds more at speed

	Weight Training	Conditioning	Notes
DAY 2 FOCUS *Pull w/ Hams*	**Prep** Full warmup **Power** a) KB swing 3x5 (heavy/power focus) b) Box jump 3x3 **Main Lifts** 1) Bent row (DB or BB) 3x6-8 (1-2 RIR) 2) Lat pulldown 2x8-10 (1 RIR) 3) Chest support T-Bar or DB row 2x8-10 (0-1 RIR) 4) Glute ham raise 2x1-2 RIR (1-2 RIR) **Arms/Core** a) Preacher curl 3x8-10 (1 RIR) b) Bench reverse crunch 3x10-15 (F) **Optional Calves/Tibs** Tibs/calf raises (optional) 2-3x8-15 ea	**None**	**Prep:** add/subtract/adjust warmup as needed (do warmup pre-jumps/tosses) Rest: 90 seconds between a & b Can increase KB swing weight if desired **Main Lifts: (Rest 2-4 minutes between main movement sets)** Refer to week 1 for intent Use same implements/machines as last week **Arms: (Super or stagger sets)** Refer to week 1 for intent

	Weight Training	Conditioning	Notes
DAY 3 FOCUS *Repeats*	**None**	**Hill Repeats** 8x1:00 Hill Repeats Recommended: Treadmill @ 5-6% incline (or outdoor hill equivalent) Pace: ~ 2 mile pace or slightly faster, or RPE 8-9 Rest: 1:30 (hop off treadmill or walk/trot back to base) Goal: repeat or slightly increase pace each round	**Hill Repeats:** stick to pacing/intensity suggestions Treadmill makes for easier control of variables, but not required

	Weight Training	Conditioning	Notes
DAY 4 REST	**None**	**None**	

	Weight Training	Conditioning	Notes
DAY 5 FOCUS *Lower Body Hypertrophy*	**Prep** Lower Warmup a) Trap bar jumps 3x3 b) Pogos 3x12 **Pump Work** a) Seated leg curl (leaned forward) 2x 12-14, 10-12 b) Xtra ROM leg Ext 2x 12-14, 10-12 **Main Lifts** 1) SSB or machine squat 1x6-8, 1x8+ 2) Hip thrust 2x6-8 3) Bulgarian split squat 2x8-10 **Core** a) Hanging leg raise 2x10-15 b) 45° side raises 2 x 1RIR	**Conditioning curcuit (3 rounds)** a) Heavy sled push 20 yd b) KB front rack carry 50 yd c) Sandbag/dball GTOS 8 each (alternating) d) Sandbag getups 12 total (6/side) Rest 2:00 between rounds	**Prep:** add/subtract/adjust lower warmup as needed (do warmup pre-jumps) Rest: 90 seconds between a & b Refer to week 1 for intent **Pump work: stagger sets (rest 60-90 sec between movements)** Refer to week 1 for intent **Main Lifts: (Rest 2-4 minutes between main movement sets, ~90 sec between BSS legs)** Refer to week 1 for intent Same machines/setups for all movements **Core work:** Refer to week 1 for intent

	Weight Training	Conditioning	Notes
DAY 6 FOCUS *Upper*	**Upper Warmup** Push 1a) DB front delt press 2x6-8 1b) Kelso shrug 2x10-12 2) Deficit pushup death Set x1 **Armageddon** 1a) Smith JM press 3x8-10 1b) Chins 3x 1RIR 2a) Cable curl 2x10-12 2b) Cable pressdown 2x10-12 **Shoulder Shocker (2 rounds, same DBs)** a) Straight arm plate raise x F b) Lateral raise x F c) Upright row X F d) Rear delt fly x F	**None**	**Push: (Rest 2-3 min between sets)** Refer to week 1 for intent **Armageddon: (Supersets or stagger sets)** Refer to week 1 for intent **Shoulder Shocker:** Refer to week 1 for intent Can add load or reps **Conditioning:** all optional - choose based on goals and how you're feeling

	Weight Training	Conditioning	Notes
DAY 7 FOCUS *Long*	**None**	**Long Run** 100 minute long run, aerobic effort (longer due to no run day 6, non tempo week incoming)	**Aerobic Run (Zone 2)** Measurement options: P: Conversational pace A: Nasal breathing C: HR: MAF 180 or 65-70% of MHR if known E: RPE 4-5 E:"Easy" Optimal: pick 2 and use them weekly *Running not required - can opt for alternative zone 2 implement if desired

PHASE 3 | WEEK 4

	Weight Training	Conditioning	Notes
DAY 1 FOCUS *Push + 1 Quad Tempo Pickup Run*	**Prep** Full warmup a) Jumping pushups 3x5-7 b) Pogos w/ high hops 3x5 (jump high every 2-3 hops - 5 high hops) **Main Lifts** 1) Incline BB/swiss press 2x6-8, 1x8+ (1-2 RIR) 2) Chain dips 6, 4, 2, 6 (1-2 RIR) 3) Cable or machine fly 2x6-8 (0 RIR) 4) Walking lunge (quad bias) 2x10-12 (1 RIR) **Arms/Shoulder (stagger sets)** a) Cable lateral 3x10-12 (F) b) Cable crossover tri-ext 3x10-12 (F) c) Farmer's walk 3 x 50 yd (7-8 RPE)	**Non Tempo Week** 30-40 minute easy run (low Z2) Or Aerobic intervals (airbike, rower or ski) 10 minutes easy warmup 21:00 of :15 hard (RPE 7-8), 1:15 easy (RPE 2-3) 10 minutes easy cooldown	**Prep:** Refer to week 1 for intent Add/subtract/adjust lower warmup as needed (do warmup pre-jumps) **Power:** see week 1 for intent **Main Lifts: (Rest 2-4 minutes between main movement sets)** Bench: 1st 2 sets 6-8, set 3 backoff w/ ~10% less load to 8+ reps DIPS: last set will be 6 w/ load, rather than BW like week 1. Goal is to hit 6 w/ 5-10 lbs less than set 1 Refer to Week 1 for intent **Arms/Shoulder: (Rest as needed/60ish sec between movements)** Refer to week 1 for intent **Conditioning:** Easy run or aerobic intervals
DAY 2 FOCUS *Pull w/ Hams*	**Prep** Full warmup **Power** a) KB swing 3x5 (heavy/power focus) b) Box jump 3x3 **Main Lifts** 1) Cable rows (upper back) 3x8-10 2) RDL 2x6-8 (1-2 RIR) 3) Lat pulldown 2x8-10 (1 RIR) 4) Chest support T-Bar or DB row 2x8-10 (0-F RIR) **Arms/Core** a) Preacher curl 3x8-10 (1 RIR) b) Bench reverse crunch 3x10-15 (F) **Optional Calves/Tibs** Tibs/calf raises (optional) 2-3x8-15 ea	**None**	**Prep:** add/subtract/adjust warmup as needed (do warmup pre-jumps/tosses) Rest: 90 seconds between a & b Can increase KB swing weight if desired **Main Lifts: (Rest 2-4 minutes between main movement sets)** Cable row replaces bent row (RDL this week) RDL will replace glute ham raise in even weeks (earlier in session due to demand) Refer to week 1 for intent Use same implements/machines as last week **Arms: (Super or stagger sets)** Refer to week 1 for intent
DAY 3 FOCUS *Repeats*	**None**	**Repeats (mixed distances)** Run Warmup Part 1: Run 1 mile, goal is to beat all miles thus far by 2-5 sec (no more) Rest 4:00 Part 2: 1 mile, goal is to finish within +/- 3 sec of part 1 Goal: Pacing discipline, perhaps a 1 mi PR?!?	**Repeats:** reduced volume this week to focus on quality and recover for next week's time trials **Pacing Example (arbitrary #s)** **Best mile so far: 6:18** **Goal: 6:13-6:16** **Result: 6:15** **Goal mile 2 = 6:12-6:18**
DAY 4 REST	**None**	**None**	
DAY 5 FOCUS *Lower Body Hypertrophy + Strength Circuit*	**Prep** Lower warmup a) Trap bar jumps 3x3 b) Pogos 3x12 **Pump Work** a) Seated leg curl (leaned forward) 2x 12-14, 10-12 b) Xtra ROM leg ext 2x 12-14, 10-12 **Main Lifts** 1) SSB or machine squat 1x6-8, 1x8+ 2) Hip thrust 2x6-8 3) Bulgarian split squat 2x8-10 **Core** a) Hanging leg raise 2x10-15 b) 45° side raises 2 x 1RIR	**None**	**Prep:** add/subtract/adjust lower warmup as needed (do warmup pre-jumps) Rest: 90 seconds between a & b Refer to week 1 for intent **Pump work: Stagger sets (rest 60-90 sec between movements)** Refer to week 1 for intent **Main Lifts: (Rest 2-4 minutes between main movement sets, ~90 sec between BSS legs)** Refer to week 1 for intent Same machines/setups for all movements **Core work:**Refer to week 1 for intent **Circuit:** Keep loads the same as week 2, note longer distances/higher rep GTO
DAY 6 FOCUS *Upper*	**Upper Warmup** Push 1a) DB front delt press 2x6-8 1b) Kelso shrug 2x10-12 2) Deficit pushup death Set x1 **Armageddon** 1a) Smith JM press 3x8-10 1b) Chins 2x 1RIR, 1xF 2a) Cable curl 2x10-12 2b) Cable pressdown 2x10-12 **Shoulder Shocker (2 rounds, same DBs)** a) Straight arm plate raise x F b) Lateral raise x F c) Upright row X F d) Rear delt fly x F	**Options** a) 20 minute easy run (35-40 if not testing next week) b) 35 minutes easy non/low impact (bike, row, etc) c) 35 minutes of aerobic intervals on bike, rower, curve runner, incline treadmill (2-3%) Description: 5 minutes easy warmup 25 minutes of: 1:15 easy, :15 hard (RPE 7-8) 5 minutes easy cooldown	**Push: (Rest 2-3 min between sets)** Refer to week 1 for intent **Armageddon: (Supersets or stagger sets)** Refer to week 1 for intent Face away mech drop: after failure, you'll step back to the machine so the cables are right below you (arms no longer behind you), then Bang out 1 set of standard cable curls. Will likely only be 2-4 reps **Shoulder Shocker:** Refer to week 1 for intent Can add load or reps **Conditioning:** all optional - choose based on goals and how you're feeling
DAY 7 REST	**None**	**None**

TIME TRIAL WEEK

	Weight Training	Conditioning	Notes
DAY 1 FOCUS *3 RM Day 1*	**DL/Front Squat Max (optional)** **Lower Warmup** Work to a 3RM front squat Work to a 3RM deadlift Work to a 3RM weighed/chain dip	**None**	**Lift Guidelines** These are 100% optional For 3RMs, only do them if you've been training the lifts Think of as "training 3RM" not "all out 3RM" If you've been using a hex bar, don't do a BB DL 3RM If you've used an SSB for loaded squats, use the SSB (another squat 3RM opportunity on day 4) If you've been doing machine dips, forgo the 3RM
	Weight Training	**Conditioning**	**Notes**
DAY 2 FOCUS *2 Mile TT*	**None**	**Optional 2 mile Time trial (TT)**	**Run Warmup** run 2 miles for time
	Weight Training	**Conditioning**	**Notes**
DAY 3 REST	**None**	**None**	
	Weight Training	**Conditioning**	**Notes**
DAY 4 FOCUS *Lift 3RM Day 2*	**Optional Bench/Back Squat PR** **Full Body Warmup** Work to a bench 3RM Work to a back squat 3RM Work to a weighted chin up 3RM	**None**	**LIFT guidlines** These are 100% optional For 3RMs, only do them if you've been training the lifts Think of as "training 3RM" not "all out 3RM" For bench and squats: use same bar you've been using for most of the program E.g. if you've been using a swiss bar, use it. If you've been using an SSB, use it. Chins: can do chin ups, neutral grip chins, or pull ups (whichever you feel most comfortable with)
	Weight Training	**Conditioning**	**Notes**
DAY 5 REST	**None**	**None**	
	Weight Training	**Conditioning**	**Notes**
DAY 6 FOCUS *5 Mile TT*	**None**	**Optional 5 mile TT**	**Run Warmup** Run 5 miles for time
	Weight Training	**Conditioning**	**Notes**
DAY 7 REST	**Congrats! You've completed JGV2!**
