TERMINATOR TRAINING METHOD

TIME CRUNCH PROGRAM

FOR THOSE WITH BUSY SCHEDULES OR MINIMAL EQUIPMENT

PROGRAM INTRO

Welcome to the Terminator Training Method Time Crunch Program. Congratulations on taking the leap and committing to the program!

Watch the intro video to learn about how this program is set up.

EQUIPMENT NEEDED

The only equipment you'll need is:

- Squat rack/stand
- Bench
- Barbell with plates
- Dumbbells
- Bands
- Something to do pull-ups on.

Optional equipment includes kettlebells and dip bars. If you have access to a full gym, you may refer to the "Exercise Substitution Library" and seek alternative exercises.

WHAT YOU WON'T SEE

Many "short workout" programs are built around doing as much as possible in 20 minutes. They're aimed at making you as fatigued as humanly possible, no/minimal rest periods, and having you finish the workout feeling smoked. I could easily write a program like that, but the results you'd get would be significantly diminished. The HIIT training day will certainly make you sweat and breathe hard, but that's the intent of the training. If you want to build your metabolism, be strong, and see results, rest is still required.

ACRONYMS/IMPORTANT NOTES

AMRAP: As many reps as possible
BB: Barbell
DB: Dumbbell
GB: Glute biased
OHP: Overhead Press
RDL: Romanian deadlift
SSB: Safety squat bar

*If there's a **letter and number (e.g. a1,a2)** for a set, this is a **superset**. Be sure to still adhere to the rest periods prescribed before doing the next set. In other words, don't immediately into the next exercise.
*If you see **AMRAP for an exercise**, you'll want to do that exercise for as many reps as possible in the given time period. For example: Walking Lunges- 3 Min AMRAP - you'll select a weight you can do for 12-15 reps per leg, and try to get as many reps as possible in the given time domain, resting as needed. If you can do lunges for the entire 3 minutes, add weight the next week.

EXERCISE SUBSTITUTIONS

The program is intended for those with basic garage gym equipment. If you're training in a gym, many of the programmed movements are more effective on machines/cables than what's listed in the plan. These movements will be annotated with a "*" (for example, a cable face pull is preferred over a band face pull and a seated hamstring curl is preferred over a banded hamstring curl). If there is an exercise in the program with no specific recommendation you may use a barbell, dumbbells or a hex bar (it's up to you).

- **Back squat:** SSB squat, hack squat, goblet squat
- **Banded face pull:** *Cable face pull
- **Banded hamstring curl:** *Any machine hamstring curl, TRX hamstring curl, rower hamstring curl
- **Banded tricep pushdown:** *Cable tricep pushdown
- **Bench press:** Machine press, dumbbell press, pushup
- **Bent over BB/DB row:** Any machine row, any cable row
- **Bulgarian split squat:** Any split squat, single leg press, any lunge
- **Calf raises:** Optional. You can work a different muscle group in isolation if you're already happy with your calves. You may use a calf raise machine (seated/standing) if you have access.
- **Chest supported incline bench row:** *Chest supported machine row (any)
- **Chin up:** Lat pulldown (same grip), machine pulldown, rack chin up, assisted chin up
- **DB high incline press:** Smith machine high incline, machine OHP, any OHP if it doesn't bother shoulders
- **DB side delt lateral:** Cable side delt lateral
- **DB skull crushers:** JM press, cable tricep overhead extensions
- **Deadlift:** Hex deadlift, dumbbell deadlift, stiff leg deadlift, RDL, good morning
- **Deficit pushup:** DB chest press, machine chest press, push-up
- **Front squat:** Goblet squat, high bar squat, SSB Squat, any machine squat
- **Glute bias (GB) reverse lunge:** GB walking lunge, GB leg press
- **Heel elevated goblet squat:** Front squat, SSB squat, Hack or pendulum squat
- **Low incline DB press:** Machine press, Incline BB press, Decline pushup
- **Rack chins:** Inverted row, lat pulldown
- **RDL:** Good morning, glute ham raise, hip thrust, glute leg press
- **Single leg RDL:** Single leg 45 degree back raise, single leg hip thrust
- **Spider curls:** Preacher curls, cable curls
- **Stiff leg deadlift:** Good morning, 45 degree back raise, hamstring curl
- **Walking lunge:** Reverse lunge

SUGGESTED WARMUP

These warmups are very basic, but effective. If you're tight on time, you can pick the movements that apply to you most and perform them before your first set. Do not spend longer than ~5 minutes warming up.

	Day 1 and 4	Day 2 and 5	Day 6
DEMO →	Lower Warmup	Upper Warmup	Full Warmup

You should also do ramp up sets before your main, recorded exercises. A ramp up set is a set before your main working sets with lighter weight and fewer reps, intended to prepare/warm up your muscles and nervous system. For example, if your first set of 6-8 reps of front squats is 200 lbs, ramp up (RU) sets may look like:

RU 1: Bar x 8-10 **RU 2**: 135 x5 **RU 3:** 185 x 3 **Working set 1**: 200 x 6-8

*Stronger people w/ heavier working sets will need more RU sets. Rest is minimal between RU sets.

ADDITIONAL VOLUME (OPTIONAL)

If you want to train for longer than 20 minutes, you're welcome to add additional volume to the workout. My suggestion is to do ONE of the following **(color coded to reflect examples on last page of program - page 7)**

OPTION 1: Another set of each movement
OPTION 2: 3 total sets of another movement
OPTION 3: Do a superset of 2 isolation movements for 2-3 sets

**Option 2 &3 are for more advanced people who can Identify their lagging muscle groups. The exercises you select should train that muscle group. Common lagging muscle groups: Calves, hamstrings, upper back, arms, glutes.*

On the last page (after phase 1 & 2) you'll find some examples for Lower Body Day 1 (same can be applied to every lower body day in any phase). If you're advanced, you have the ability to be sensible with the movements you select.

These exercises are JUST EXAMPLES. You can choose any movement you want, but try to avoid redundancy if able. Redundancy in a training session is two exercises that mimic each other, or work similar muscles in a similar fashion. An example would be a front squat and a barbell squat, or a Romanian deadlift and a good morning.

TIME CRUNCH

PHASE 1 | WEEK 1-4

	Exercise	Sets/Reps	Rest
DAY 1 LOWER BODY	a) Front squat b) Romanian deadlift c) Walking lunges	3X6-8 3X6-8 3 minute AMRAP	2:00 2:00
DAY 2 UPPER BODY	a1) Incline DB press b2) Chest supported incline bench row b1) DB curl b2) Close grip pushup	3X6-8 3X6-8 3X10 3X10	1:00 1:00 0:30 0:30
DAY 3 HIIT	Airbike, rower, hill, ski erg, incline treadmill If you're unable to maintain output, you may increase rest. *Each week, do 2 additional rounds **(wk 2 = 8, wk 3 = 10, wk 4 = 12)**	6 x 15 sec. sprint 9+/10 effort	1:15
DAY 4 LOWER BODY	a) Deadlift b) Deficit reverse lunge (alternating) c) Calf raise d) Banded hamstring curls	3x6 2x12 each leg 2x12-15 2x12-15	2:30 1:30 0:30 0:30
DAY 5 UPPER BODY	a1) Bench press a2) Chin up b1) High incline front delt press b2) Banded face pull	3x6-8 3x6-8 2X6-8 2X10-12	1:00 1:00 0:45 0:45
DAY 6 FULL BODY	a1) Heel elevated goblet squat a2) Deficit push-up b1) Stiff leg deadlift b2) Banded face pull b3) Rack pull up	3x12 AMRAP 45 Seconds 3X8-10 3X10-12 3x10-12	0:30 0:30 1:00 0:30 0:30
DAY 7 OPTIONAL	Minimum of 20-minutes of low intensity cardio. You can hike, bike, run, walk, swim, surf, ski, golf, play a sport or do something active outside. Ensure your pace allows you to have a conversation (zone 2 if you prefer heart rate zones)

Repeat phase 1 weeks 1-4

TIME CRUNCH

PHASE 2 | WEEK 5-8

	Exercise	Sets/Reps	Rest
DAY 1 LOWER BODY	a) Back squat	3X6-8	2:00
	b) Stiff leg Deadlift	2x6-8	2:00
	c) Reverse lunge (alternating)	3 Min Amrap	
DAY 2 UPPER BODY	a1) High incline DB press	3X6-8	1:00
	b2) Bent DB row	3X6-8	1:00
	b1) Spider curls	3X10	0:30
	b2) DB skull crushers	3X10	0:30
DAY 3 HIIT	Airbike, rower, hill (or incline treadmill)	8 x 20 sec. sprint 9+/10 effort	1:10
	If you're unable to maintain output, you may increase rest. Each week, do 1 additional round, and feel free to switch up the modality (wk 6 = 9, wk 7 = 10, wk 8 = 11)		
DAY 4 LOWER BODY	a) Romanian deadlift	3x10	2:00
	b) Heels elevated *tempo goblet squat *4 sec lower, 2 sec pause, 1 sec/explode up	3x10	1:30
	c) Calf raise	2x10-12	0:30
	d) Walking lunge	2x10-12	0:30
DAY 5 UPPER BODY	a1) Push-up	3x10-12	1:00
	a2) Rack pull up	3x6-8	1:00
	b1) Incline DB press	2X8-10	0:45
	b2) Inverted row	45 Sec AMRAP	0:45
DAY 6 FULL BODY	a1) Bulgarian split squat	2x8-10	0:30
	a2) Single leg RDL	2x8-10	0:30
	b1) DB side lateral	3X8X10	0:30
	b2) Banded tricep pressdown	3X10-12	0:30
	b3) Banded face pull	3x10-12	0:30
DAY 7 OPTIONAL	Minimum of 20-minutes of low intensity cardio. You can hike, bike, run, walk, swim, surf, ski, golf, play a sport or do something active outside. Ensure your pace allows you to have a conversation (zone 2 if you prefer heart rate zones)		

Repeat phase 2 weeks 5-8

TIME CRUNCH

ADDITIONAL VOLUME (OPTIONAL)

See page 4 for notes about additional volume option

	Exercise	Sets/Reps	Rest
LOWER BODY OPTION 1	a) Front squat	4X6-8	2:00
	b) Romanian deadlift	4X6-8	2:00
LOWER BODY OPTION 2	a) Front squat	3X6-8	2:00
	b) Romanian deadlift	3X6-8	2:00
	c) Leg press or walking lunge	3x8-10	2:00
LOWER BODY OPTION 3	a) Front squat	3X6-8	2:00
	b) Romanian deadlift	3X6X8	2:00
	c1) Hamstring curl	2-3x10-12	2:00
	c2) Leg extension	2-3X10-12	2:00
UPPER BODY OPTION 1	a1) Incline DB press	4X6-8	1:00
	a2) Chest support incline bench row	4X6-8	1:00
	b1) DB curl	4x10	0:30
	b2) Close grip pushup	4x10	0:30
UPPER BODY OPTION 2	a1) Incline DB press	3X8-10	1:00
	a2) Chest support incline bench row	3X8-10	1:00
	b1) DB curl	3x10	0:30
	b2) Close grip pushup	3x10	0:30
	c) Machine row or barbell rows	3x8-10	0:30
UPPER BODY OPTION 3	a1) Incline DB press	3X8-10	1:00
	a2) Chest support incline bench row	3X8-10	1:00
	b1) DB curl	3x10	0:30
	b2) Close grip pushup	3x10	0:30
	c1) Cable fly or DB fly	2-3x10-12	0:30
	c2) Cable or DB rear delt fly	2-3x10-12	0:30
